EXECUTIVE SUMMARY

The major findings of the 2008 SIAST Graduate Employment Survey (GES) are listed below. Where possible, for comparison, the 2007 figures are included in brackets. The results below identify SIAST-wide figures. Divisional, as well as base and continuing education (shortened to CE in the report: *prior to July 2007, CE programs were referred to as **extension** programs*) program breakdowns are identified in the *Overview of Results* section and the results on program data are located in the program pages at the end of the report.

- Graduates that received credentials in the time period July 2007 – June 2008 were surveyed.
- **3,621 (3,726) graduates were surveyed**, 2,237 from base programs, and 1,384 from continuing education programs.
- The 3,621 graduates received credentials from **132 distinct programs**.
- The following credentials were awarded: applied certificate (841), certificate (1,901), advanced certificate (110), and diploma (769).
- Of the 3,621 surveyed graduates, 1,640 (2,254) responded, for an overall **response rate of 45%** (60%).
- 1,081 of the respondents were graduates from base programs, for a response rate of **48%** (65%), while the remaining 559 respondents were from continuing education programs, for a response rate of **40%** (54%).
- **59%** (63%) of respondents reported **seeking employment in this field** as the primary reason for completing their programs.
- **92%** (94%) of respondents **who were available to work** were **employed (employment rate)**.
- **79%** (79%) of respondents available to work (defined as the **labour force**) were **in training-related occupations**.
- **71%** (72%) of respondents available to work were employed in **full-time** occupations and **62%** (61%) of the respondents available for work were employed in **full-time training-related** occupations.
- Of those respondents who were employed, **23%** (23%) were **working part-time or casually**, and of these, **50%** (**45%**) reported that the part-time work was **by choice**.
- **6%** (**6%**) of employed respondents indicated that they were **self-employed**.
- The **average salary** for respondents in **full-time training-related** employment was **\$2,893** (\$2,799) per month.
- **96%** (94%) of employed respondents were **working in Saskatchewan**. **47%** (51%) of this figure were working either in **Regina** or **Saskatoon**.
- **4%** (6%) of the respondents indicated they were **working outside Saskatchewan**, and of that figure, **89%** (78%) reported that this was **by choice**. Of the 4% (6%) that reported working outside Saskatchewan, 39% (48%) indicated **personal reasons** as the primary reason for leaving the province.
- Of those respondents who reported they were not working at the time of the survey, **71%** (65%) indicated that they **had worked** at some time since graduation, and **65%** (57%) reported that they were scheduled to return to work in the future.

- **65%** (61%) of respondents that had worked but were not employed at the time of the survey indicated that the work had been directly related to the education and training they received in their programs.
- **54%** (50%) of respondents, who were not employed, indicated they were **not looking** for work, primarily because they were enrolled in further education.
- The primary reason the unemployed respondents were not currently employed was that they were **returning for further education (33%)**
- **37%** (22%) of respondents indicated that they were **enrolled in further education**. Of this figure, **59%** (49%) were **enrolled in a SIAST program** – either the same SIAST program (different credential) or a different program altogether.
- **Almost 98%** (97%) of all respondents **rated the overall program quality at SIAST as good to excellent**.
- **95%** (96%) of all employed respondents rated **the ability of the program to prepare them for employment in their field of study as good to excellent**.
- The **average age** of all respondents was **29** (27) years. The average age level was lower in the base programs, at **26** (25) years of age, and much higher in the continuing education programs at **33** (31) years of age.
- **57%** (58%) of respondents were **female** and **43%** (42%) were **male**.
- **14%** (14%) of respondents identified themselves as being of **Aboriginal** origin. The Aboriginal respondents identified themselves as **40%** (38%) Status/Treaty Indian, **55%** (55%) as Métis, **5%** (6%) as Non-Status Indian, and none (none) as Inuit.
- **4%** (6%) of respondents indicated that they were **persons with disabilities** and **9%** (7%) identified themselves as members of a **visible minority**.

INTRODUCTION

1.0 Introduction

The SIAST Graduate Employment Report is produced from data collected from the SIAST Graduate Employment Survey (GES). The survey collects data from a variety of questions relating to the employment status, evaluation of training, and general demographic characteristics of SIAST's graduates.

SIAST is committed to ensuring the success of individuals who have completed one of the institute's programs. Graduate feedback from the survey provides valuable information about the quality of training and the success of SIAST graduates in the labour market. A wide range of stakeholders, from SIAST management, government, high school students and career counsellors, labour analysts, and policy administrators, use the Graduate Employment Report as a reference document for program and labour market review and planning. The Institutional Research & Analysis (IR&A) unit at SIAST undertook the survey on behalf of the institution.

1.1 Scope

The 2008 SIAST GES contracted 3,621 graduates who completed a SIAST program of study and graduated between July 2007 and June 2008.

In the 2007-2008 academic year, SIAST had graduates from a total of 132 distinct credentialed programs. Many SIAST programs are also offered off-campus throughout the province, and these are considered continuing education programs. SIAST continuing education programs are generally cost-recovery and are offered throughout the province in a variety of delivery formats: with partners, via distance education learning and in industry-based training formats.

All programs at SIAST are clustered and reported within one of the following six program divisions:

Business and Entrepreneurial Studies	Community Services
Industrial Training	Nursing
Science and Health	Technology

One of the following four credentials is awarded for each SIAST program: *Applied Certificate*, *Certificate*, *Advanced Certificate*, and *Diploma*. In some instances a program may have both a certificate and diploma level exit credential.

In order to have programs that are current, SIAST continually reviews the program mix. Some programs may have recently been deleted but graduates were permitted to complete their programs and graduate. Some programs have been re-titled or re-credentialed. Appendix A lists changes to the programs offered.

1.2 Methodology

Data Collection and Analysis

A census of SIAST graduates within an academic year was undertaken to obtain a sufficient number of graduates for the GES. The graduate contact list, including telephone numbers and mailing addresses, was provided by Registration Services at SIAST.

A tri-modal data collection process was used to contact SIAST graduates. It consisted of three phases, which occurred between December 2008 and April 2009. The first was a mail out of a self-administered paper survey to all 3,621 graduates. In December 2008, each graduate received the questionnaire to complete, along with a letter explaining the purpose of the study. A link to an online version of the survey was also provided in the invitation letter for those respondents who would prefer to complete the survey using the Internet. The invitation letter was followed up with an e-mail invitation that contained an electronic link to the online survey.

In March /April 2008, Norsask Consumer Interviewing Services Ltd. of Saskatoon was contracted to conduct one-on-one telephone interviews with those graduates who did not respond to the mail-out questionnaires or email invitation by February, 2009. Every effort was made to contact the graduates in order to provide the

highest possible response rate. The participants were entered to win a 17" wireless Duo Base processor 2GB laptop as well as three early bird draws of either an iPod or Digital camera to encourage them to participate the survey.

The online responses were collected using the Perseus Enterprise web-based survey tool, a method that IR&A introduced in 2007. The purpose of this method was for respondents to directly enter their own responses to the questions in the survey and therefore avoid any misinterpretation of responses when entered manually. The responses from the mail-in portion of the survey (paper version) had to be manually entered by IR&A staff. IR&A continues to develop new measures to have all future graduate employment surveys completed online. The responses from graduates by the different methods of surveying were merged, checked for accuracy, consistency, and then analyzed using the Statistical Package for Social Science (SPSS) software.

1.3 Response Rate and Validity of Results

A total of 1,640 graduates participated in the 2008 GES, with an overall response rate of 45 percent, a decline of 15% over 2007. Table 1 provides the response rates for SIAST overall, by division, and by base/continuing education.

SIAST's GES is unique because, rather than survey a sample of the 2008 SIAST graduates, a full census of every graduate was undertaken. SIAST is a post-secondary institution offering more than 132 distinct programs at four urban campuses as well as numerous rural locations. Some of these programs have less than thirty graduates, which make it impossible to survey a sample of the graduates and obtain meaningful results at the individual program level.

Table 1: Survey Response Rate, by Division, by Base/Continuing Education, 2008

2008	Graduates	Respondents	Response Rate
SIAST Overall Programs by Division			
Business and Entrepreneurial Studies	611	293	48%
Community Services	639	305	48%
Industrial Training	892	314	35%
Nursing	182	94	52%
Science and Health	757	362	48%
Technology	540	272	50%
Total SIAST Programs	3621	1640	45%
SIAST Base Programs by Division			
Business and Entrepreneurial Studies	399	189	47%
Community Services	459	228	50%
Industrial Training	395	172	44%
Nursing	141	73	52%
Science and Health	432	196	45%
Technology	411	223	54%
Total SIAST Base Programs	2237	1081	48%
SIAST CE Programs by Division			
Business and Entrepreneurial Studies	212	104	49%
Community Services	180	77	43%
Industrial Training	497	142	29%
Nursing	41	21	51%
Science and Health	325	166	51%
Technology	129	49	38%
Total SIAST CE Programs	1384	559	40%

Response Rates for Small Populations

For populations with less than 30 participants, as is the case with several SIAST programs, it is recommended that all participants be surveyed, in order to obtain reliable information. At the program level, the results will provide a good indication of graduate success and training quality, but may not be representative of all graduates from that program if the population is less than 30 graduates, and only a small portion of graduates responded. However, SIAST made every effort to contact all the graduates and encourage them to participate.

Note: When viewing individual program pages, with low small number of graduates and low response rate (i.e., less than 30%) generalizations to the graduates who did not participate in the survey should be made with caution.

1.4 Reporting of Results

The 2008 SIAST GES report was compiled from an analysis of the results of the survey. The findings of the analysis are presented in the *Overview of Results* that summarizes the survey results regarding employment status, program assessment and general graduate demographics by SIAST overall, by base (primarily on-campus activity) and continuing education (primarily brokered off-campus activity throughout the province), as well as the six SIAST program divisions.

Two types of ratios have been included in the Graduate Employment Report for questions pertaining to employment status and training-related employment. In Sections 2.1.1 to 2.1.6, employment information is presented as a percentage of those graduates available to work. According to Statistics Canada, the *available to work* is defined as the *labour force* and includes those that are currently employed, as well as those not currently employed but who are seeking employment.

For example, 1,640 graduates responded to the question regarding employment status (full-time versus part-time). Of these, 1,109 respondents indicated that they are employed full-time. In calculating the full-time employment rate listed in the sections mentioned above, the 1,109 responses are divided by the available workforce total – 1,552 (comprised of 1,435 respondents employed and 117 respondents actively seeking employment), for a full-time employment rate of 71 percent, a 1 percent decline from 2007.

In the remaining sections of the *Overview of Results*, the employment-related percentages have been calculated based upon the total number of graduates who responded to the respective employment questions in the survey rather than the available workforce. For example, in reporting employment status (Section 2.3.1), the frequency for those respondents with a full-time status (77 percent), was calculated by dividing the 1,109 respondents who indicated they are employed full-time by the 1,435 graduates who responded they were employed.

For Sections 2.3.1 and 2.3.2, similar employment-related percentages using the available workforce as a divisor may be viewed in the *Graduate Employment Indicators* and the program pages at the back of the report.

The percentage results throughout the report have been rounded to the nearest whole percentage and therefore in some cases the total percentages may vary slightly from 100%.

In presenting the results, the total number of graduates responding to each question will vary because: a) respondents did not always provide an answer to each question; and/or b) some questions were not relevant to all respondents. For example, some questions were asked only of those who were currently employed at the time of the survey, and conversely, other questions were asked only of those who were not currently employed at the time of the survey.

The *Appendices* section at the back of the report contains a listing of programs that have recently been revised, either re-titled, identified with different credentials, or deleted (appendix A); a copy of the survey questionnaire (appendix B); a question-by-question response count (appendix C); general SIAST information (appendix D); a list of tables (appendix E); and a list of graphs (appendix F).

OVERVIEW OF RESULTS

2.0 Employment

Respondents were asked to respond to a number of questions regarding their ability to secure employment after graduation, as well as the details of that employment, such as employment status (full or part-time), location, number of jobs held, and the relationship of employment to training.

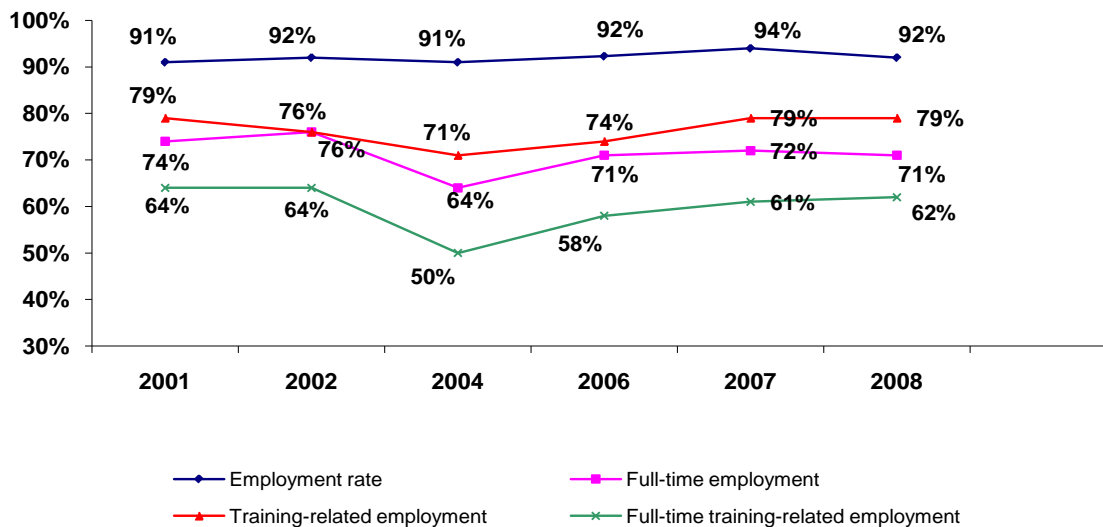

2.1 Employment Rates

2.1.1 Employment Rates for SIAST Overall

The following employment rates are calculated based on those respondents who are **available to work**. The respondents who are included in the available to work category are those *who were employed at the time of the survey and those who were not employed but were looking for work* (Statistics Canada's definition of the *Labour Force*).

In the 2008 GES, the overall employment rate for all respondents was 92 percent, a 2 percent decline over 2007. Figure 1 further illustrates that the employment rate had remained relatively constant, fluctuating by one or two percent over the past six years that the survey has been conducted. The full-time and training-related employment rates remained well above 70 percent since the overall drop in employment in 2004.

Figure 1: Employment Trends for SIAST Graduates, Based on Available Workforce, 2001-2008

Similar to 2007, the 2008 GES results indicate that over 70 percent of respondents are finding employment that is both full-time and training-related.

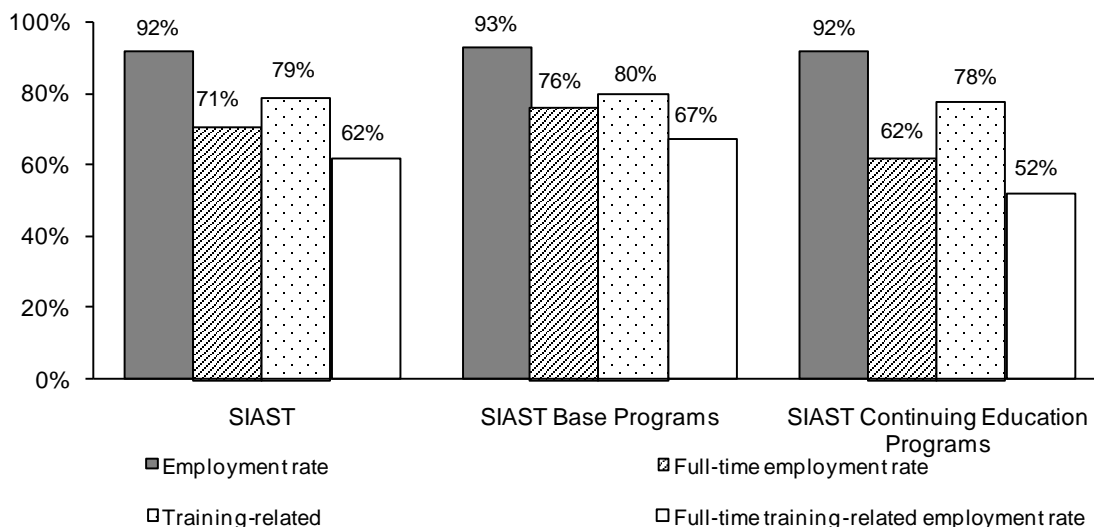

The level of full-time employment reported by the individuals surveyed declined to 71 percent in 2008 whereas the proportion of respondents who were able to obtain training-related employment at the time of the survey, remained at 79 percent, matching the high reported in 2001 and 2007.

The proportion of respondents who were able to find full-time employment in a training-related field has progressively increased since 2004 to 62 percent in 2008, a 1 percent increase from 2007. It is anticipated that this percentage may decline for 2009 due to economic slowdown in the province but may increase with the economic growth.

2.1.2 Employment Rates for Base and Continuing Education (CE) Programs Overall

Figure 2 compares the employment rates for base and continuing education programs in 2008, with that of SIAST overall. The employment rate for base programs (93 percent) and continuing education programs (92 percent) are comparable to the SIAST overall employment rate of 92 percent. As shown in the Figure 2, the full-time and full-time training-related employment rates for base programs were higher than for continuing education programs.

Figure 2: Employment Rates, by Base/Continuing Education, Based on Available Workforce, 2008

2.1.3 Employment Rates by Division Overall (Base and Continuing Education)

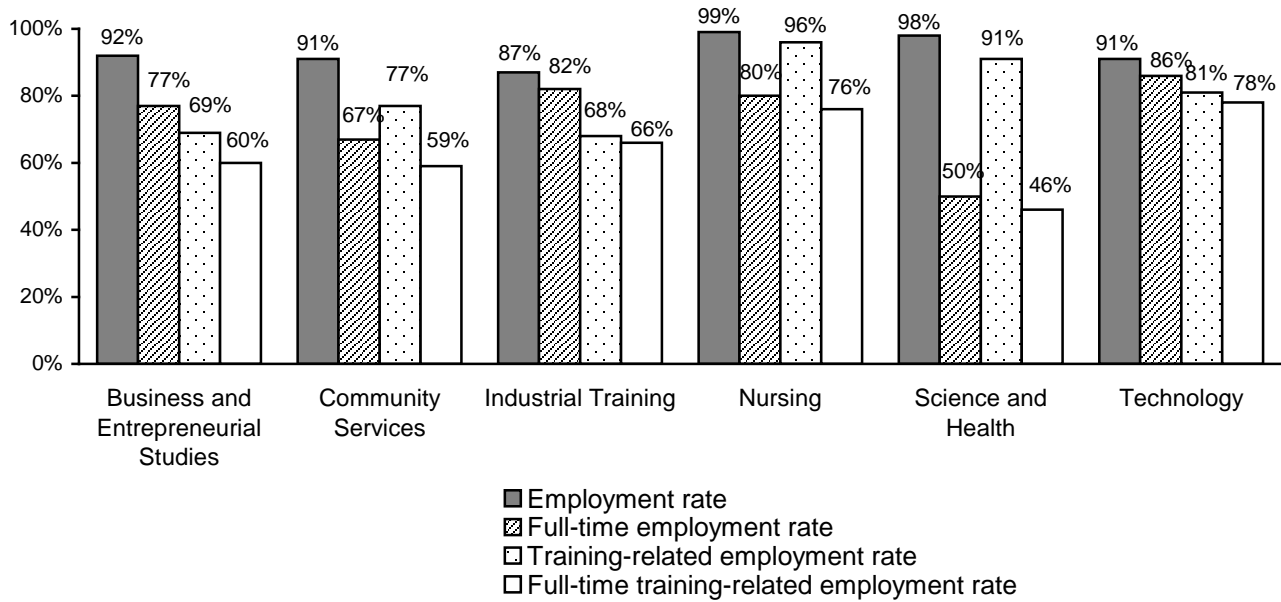

Figure 3 provides a breakdown of employment rates for each of the six program divisions.

Higher employment rates of those who graduated from nursing (99 percent), and science and health (98 percent), divisions pulled the overall SIAST graduates employment rate to 92 percent (Figure 3). The graduates of the industrial training division have an employment rate of 87 percent, which is lower than the SIAST overall employment rate.

Similarly, employment rates of those who graduated from nursing (96 percent), science and health (91 percent), and technology (81 percent) pulled the overall SIAST training-related employment rate to 79 percent.

With the shortage of trade related workers in the province, it was not surprising that respondent in the nursing, and technology divisions reported the highest full-time training-related employment rates of 76 percent, and 78 percent, respectively.

Figure 3: Employment Rates, by Division, Based on Available Workforce, 2008

2.1.4 Employment Rates by Division (Base and Continuing Education Reported Separately)

Table 2 provides a further breakdown of employment rates by division for base and continuing education programs.

For the SIAST base programs, the divisions of nursing (99 percent) and science and health (98 percent) report the highest employment rates. For continuing education programs, the divisions of nursing (100 percent), science and health (98 percent), and community services (97 percent) have the highest employment rates, but industrial training (84 percent) and technology divisions (81 percent) report employment rates, which is relatively lower than other divisions.

Once again, graduates from the technology, nursing and industrial training divisions in base programs and nursing, community services and technology divisions in continuing education programs were more likely to find full-time training related employment. Respondents from the science and health (24 percent), and business and entrepreneurial studies (56 percent) divisions in the continuing education programs and the community services program (54 percent) in the base program reported the lowest numbers of full-time training-related employment.

Table 2: Employment Rates, by Division, by Base/Continuing Education, Based on Available Workforce, 2008

	Available for work	Employment rate	Full-time employment rate	Training-related employment rate	Full-time training-related employment rate
SIAST Base Programs by Division					
Business and Entrepreneurial Studies	176	91%	76%	69%	61%
Community Services	208	89%	63%	72%	54%
Industrial Training	164	90%	86%	74%	73%
Nursing	72	99%	78%	96%	75%

2.1.5 Employment Rates for Aboriginal Respondents

Figure 4 indicates the employment rates, training-related employment rates, and full-time training-related employment rates by divisions further categorized by base and continuing education programs for Aboriginal respondents.

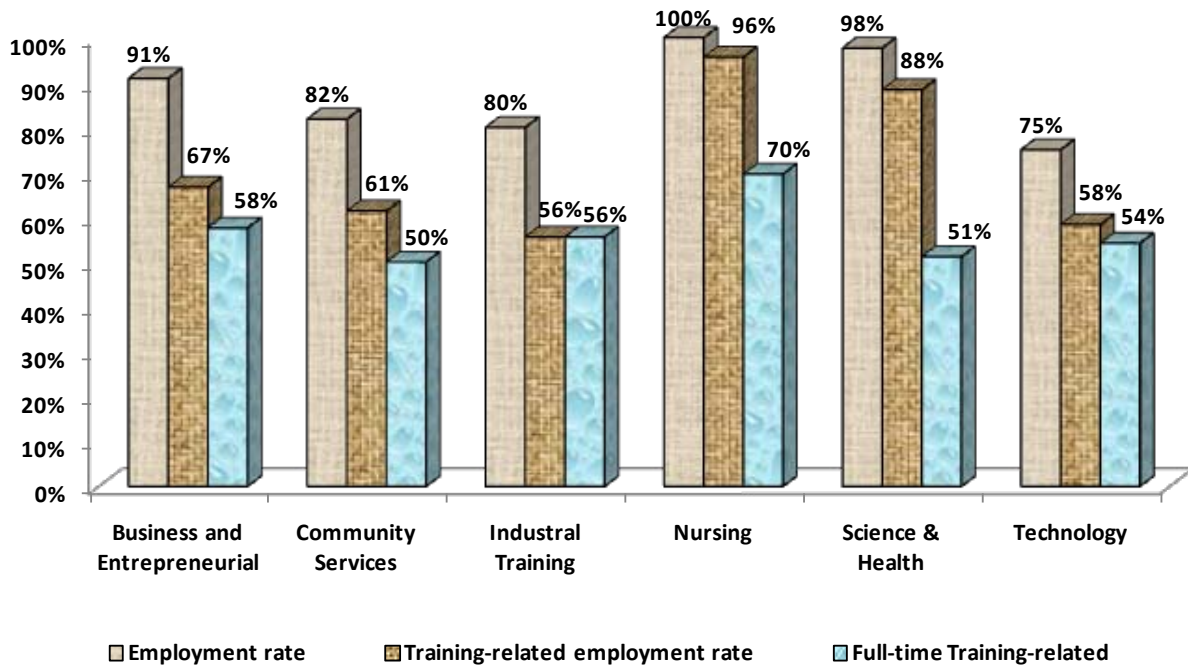

Both the nursing division (at 96 percent for training-related employment rate, a 4 percent increase over 2007) and the science and health division (at 88 percent for training-related employment rate, a 2 percent increase over 2007) showed encouraging results for the Aboriginal graduates in these divisions.

The employment rates for Aboriginal graduates by division based on those available to work were:

- Business and Entrepreneurial Studies 91%
- Community Services 82%
- Industrial Training 80%
- Nursing 100%
- Science and Health 98%
- Technology 75%

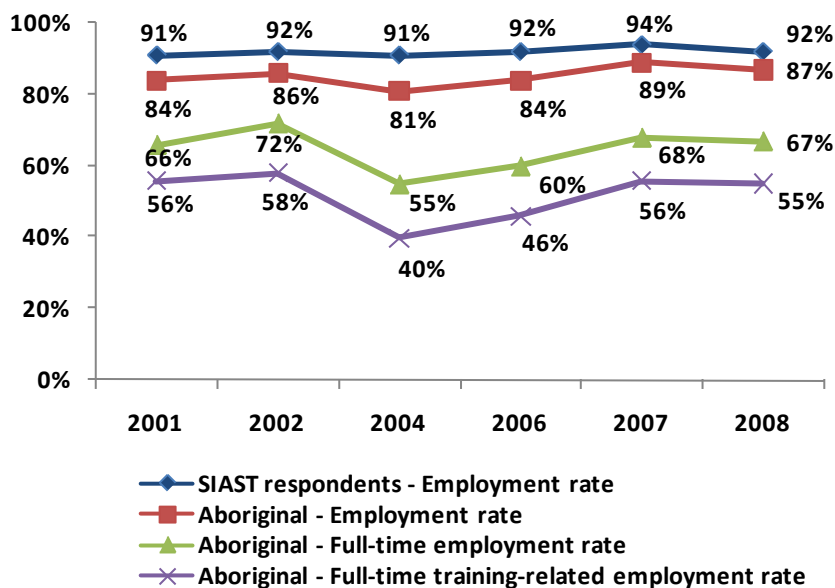

Employment rates in 2008 for Aboriginal graduates have increased from those reported in 2007 and were the highest rate reported since 2000. Similarly, the employment rates for all respondents to the survey have increased from the rates in 2006. Figure 5 provides a six-year trend of employment rates for the Aboriginal respondents, which shows the levelling off of employment rates for Aboriginal people at just over 85 percent.

Figure 4: Employment Rates for Aboriginal Respondents, by Division, Based on Available Workforce, 2008

As depicted in Figure 5, the employment rates for Aboriginal respondents in the 2008 survey were 87 percent, a 2 percent decline over 2007. While this is lower than the employment rate for all SIAST graduates, it is the second highest employment rate reported for Aboriginal graduates since 2004. The Aboriginal full-time employment rate of 67 percent and full-time training-related employment rate of 55 percent have also increased from the significant drop reported in 2004.

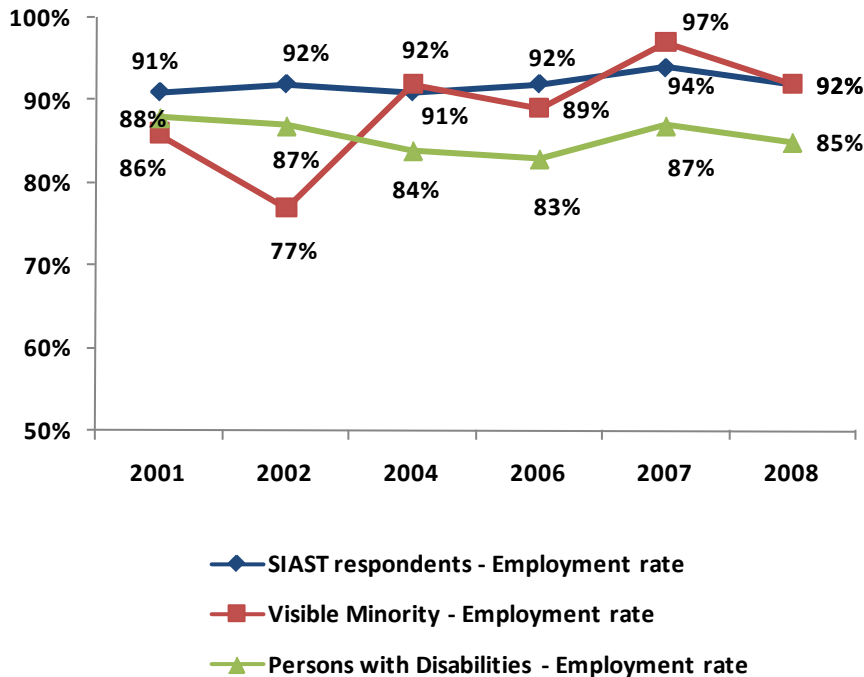

Figure 5: Employment Trends for Aboriginal Respondents, Based on Available Workforce, 2001- 2008

2.1.6 Employment Trends for Persons with Disabilities and the Visible Minority Respondents

As shown in Figure 6, the employment rate for persons with disabilities and visible minority respondents was 85 percent, (a 2 percent decline over 2007), and 92 percent, (a 5 percent decline over 2007), respectively.

Figure 6: Employment Trends for Persons with Disabilities and Visible Minority Respondents, Based on Available Workforce, 2001-2008

2.2 Training-Related Employment, Based on Number Employed*

***Note: In the remaining sections of the *Overview of Results*, the employment related percentages have been calculated based upon the total number of *employed* graduates rather than the available workforce. Similar employment-related percentages using the available workforce as a divisor may be viewed in the *Graduate Employment Indicators* or the program pages at the end of this report.**

Are you employed in a job directly related to the education and training you received in your program at SIAST? (Question 12)

The majority of respondents obtained employment which directly related to their training; 85 percent of all employed SIAST respondents were working at training-related jobs at the time of the survey (Figure 7). Overall, this is 1 percent higher than that reported in 2007 (84 percent). Respondents from the nursing (97 percent) and science and health (94 percent) divisions had the most success in obtaining training-related employment while respondents from business and entrepreneurial (85%) and industrial training (78%) had relatively low rate of training related employment.

Figure 7: Training-Related Employment, by Division, 2008

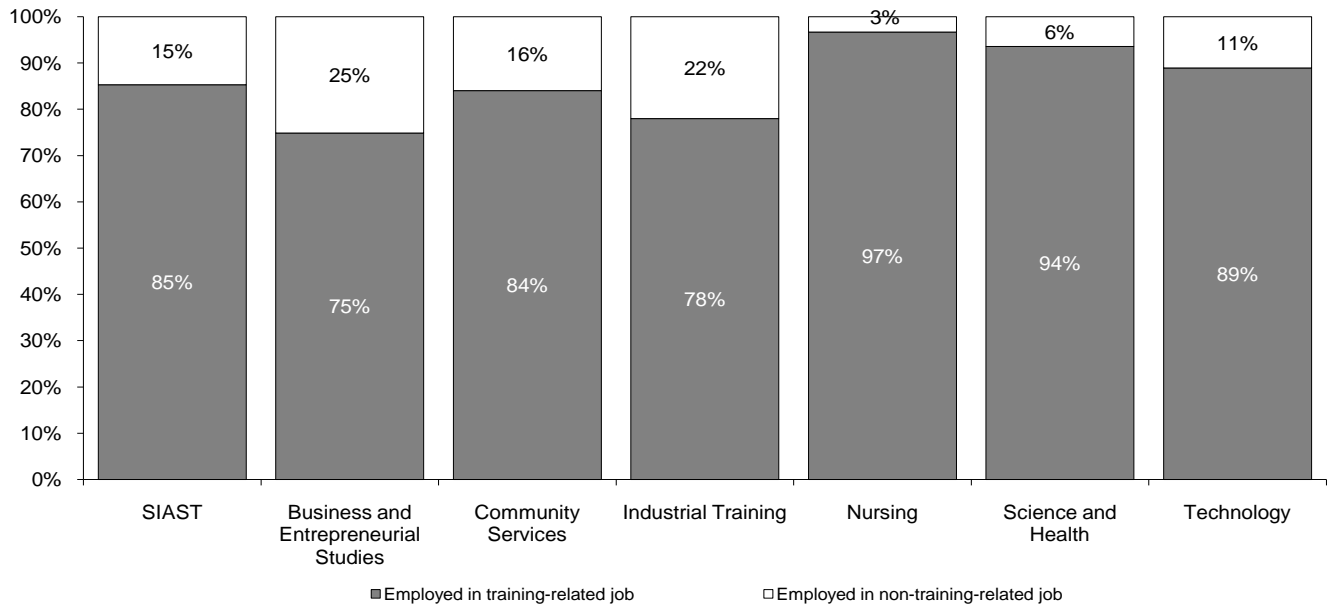

Table 3 provides a breakdown of training-related employment by base and continuing education programming for each division. The graduates from nursing, and science and health divisions had the largest percentage of respondents with training-related employment. The nursing division had the highest percent of both base program graduates (97%) and continuing education program graduates (95%) employed in a training related job. The science and health division had the second highest percentage of training related employment in the base program (95 percent) while community services had the second highest employment rate in continuing education program (94%). In many of the nursing and science and health programs, respondents are required to have completed their training and be licensed by a national accrediting agency before practicing their skills in the health field. Overall, almost the same percentage of graduates from base, 86%, and continuing education, 85%, programs were able to find training related employment.

Table 3: Training-Related Employment, by Division, by Base/Continuing Education, 2008

	Total Employed	Number Employed in training- related job	Percent Employed in training- related job
SIAST Base Programs by Division			
Business and Entrepreneurial Studies	160	122	76%
Community Services	185	150	81%

Total SIAST CE Programs	484	409	84%
OVERALL SIAST TOTAL	1435	1225	85%

2.3 Employment Status, Based on Number Employed

2.3.1 Full or Part-time/Casual Employment

What is your employment status of your *primary* job: (Question 15)

- a) *Permanent Full-time (30 hours or more per week),*
- b) *Permanent Part-time (less than 30 hours per week),*
- c) *Non-Permanent Full-time (i.e., term, contract, seasonal),*
- d) *Non-Permanent Part-time (i.e., term, contract, seasonal),*
- e) *Casual (variety of hours per week)*

Full-time employment is defined as working 30 hours or more per week and part-time and casual employment are defined as working less than 30 hours per week. Similar to 2007, 77 percent of all SIAST respondents surveyed were working full-time in their primary job; while the remaining 23 percent of respondents had a primary job that was part-time or casual.

As shown in Figure 8, the technology division had the highest percentage of respondents (95 percent) with full-time employment in their primary job followed by industrial training division (93 percent). The respondents in science and health, 51 percent, were the least likely to obtain full-time employment in their primary job. However, on average, over three-fourths of SIAST graduates were able to find full-time employment in their primary job.

Figure 8: Full or Part-Time Employment in Primary Job, by Division, 2008

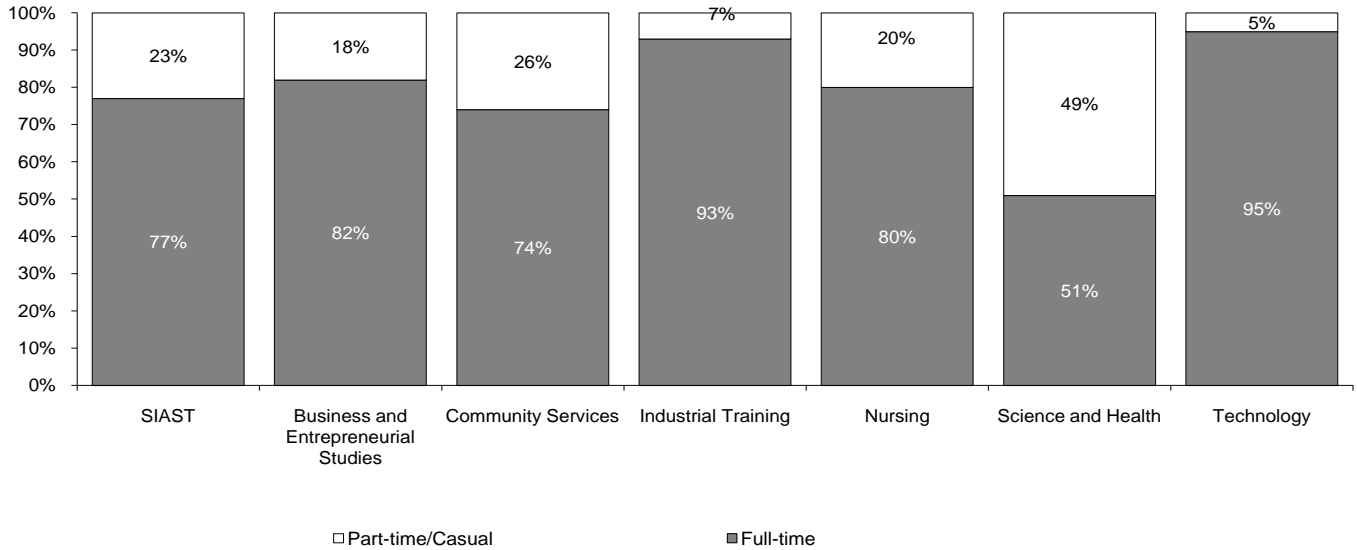

Table 4 provides the further breakdown of employment status grams for each division in base and continuing education programs. On average, 82 percent of respondents from base programs were employed full-time positions, while only a 67 percent of respondents from continuing education programs were employed full-time positions. As shown in Table 4, over 70 percent of graduates in all divisions in the base programs were able to secure full-time positions. The graduates from continuing education programs were also able to secure full-time employment similar to base programs graduates with the exception of graduates in Science and Health. Only a 29 percent of graduates in Science and Health were able to find full-time employment.

Table 4: Full or Part-Time Employment in Primary Job, by Division, by Base/Continuing Education, 2008

	Total Employed	Full-time	Part-time/Casual
SIAST Base Programs by Division			
Business and Entrepreneurial Studies	160	84%	16%
Community Services	185	71%	29%
Industrial Training	148	95%	5%
Nursing	71	79%	21%
Science and Health	187	70%	30%
Technology	200	96%	4%
Total SIAST Base Programs	951	82%	18%

Industrial Training	115	91%	9%
Nursing	21	86%	14%
Science and Health	156	29%	71%
Technology	35	94%	6%
Total SIAST CE Programs	484	67%	33%
OVERALL SIAST TOTAL	1435	77%	23%

2.3.2 Part-time/Casual Position – by Choice

If your primary job is a part-time or casual position, is this by choice? (Question 16)

It is assumed that those working in part-time or casual jobs do so because they cannot secure full-time employment. This particular question had been added to the GES beginning in 2002, in order to clarify if graduates wanted to work in part-time or casual positions. In 2008, of those who worked as part-time/casual, 50 percent of them indicated they chose to work part-time/casual by choice, a 5 percent higher than that in 2007.

For SIAST base divisions, the industrial training had the highest proportions of respondents (71 percent) who were working part-time by choice. The percentage of graduates who worked part-time or casual in the continuing education program ranged from 33 to 100 percent with an average of 50 percent.

Table 5 provides a breakdown of part-time employment by choice for base and continuing education programming by division.

Table 5: Part-Time or Casual by Choice, by Division, by Base/Continuing Education, 2008

	Total Employed partime/Casual	Part-time/ Casual by choice
SIAST Base Programs by Division		
Business and Entrepreneurial Studies	26	42%
Community Services	54	56%

Nursing	15	53%
Science and Health	57	49%
Technology	9	33%
Total SIAST Base Programs	168	51%
SIAST CE Programs by Division		
Business and Entrepreneurial Studies	20	65%
Community Services	12	33%
Industrial Training	11	46%
Nursing	3	100%
Science and Health	111	49%
Technology	2	50%
Total SIAST CE Education Programs	159	50%
OVERALL SIAST TOTAL	327	50%

2.3.3 Self-Employed

Are you self-employed? (Question 11)

The percentage of respondents indicating they were self-employed remains fairly low. Overall, 6 percent of all the respondents indicated their desire for self-employment, which is similar to that reported in 2007. The greatest interest for self employment came from the industrial training division in the continuing education programs (17 percent), followed by the community services division (12 percent). The graduates from continuing education programs are more likely to pursue self-employment.

Table 6: Self-Employment, by Division, by Base/ Continuing Education, 2008

	Total Employed	Percent Self-employed
SIAST Base Programs by Division

Technology	35	9%
Total SIAST CE Programs	485	9%
SIAST OVERALL	1435	6%

2.3.4 Number of Jobs

How many jobs do you currently have? (Question 13)

Census results from Statistics Canada indicated that many in today's labour force had multiple jobs and that this trend would continue. Results of the GES confirm this fact. The average number of jobs that employed respondents from both base and continuing education programs had was 1.25. The highest number of jobs held by some respondents in continuing education programs was eight. The highest number of jobs held in the base programs was seven.

Table 7: Number of Current Jobs Held, by Division, by Base/Continuing Education, 2008

	Total Respondents	Average	Maximum
SIAST Base Programs by Division			
Business and Entrepreneurial Studies	160	1.22	7
Community Services	185	1.35	5

OVERALL SIAST TOTAL	1432	1.25	8

3.0 Salaries

Respondents were asked to indicate the salary they earned. Since some employed gave an hourly rate and others a monthly salary, all identified hourly rates were converted to a monthly rate.

3.1 Salaries for SIAST Respondents

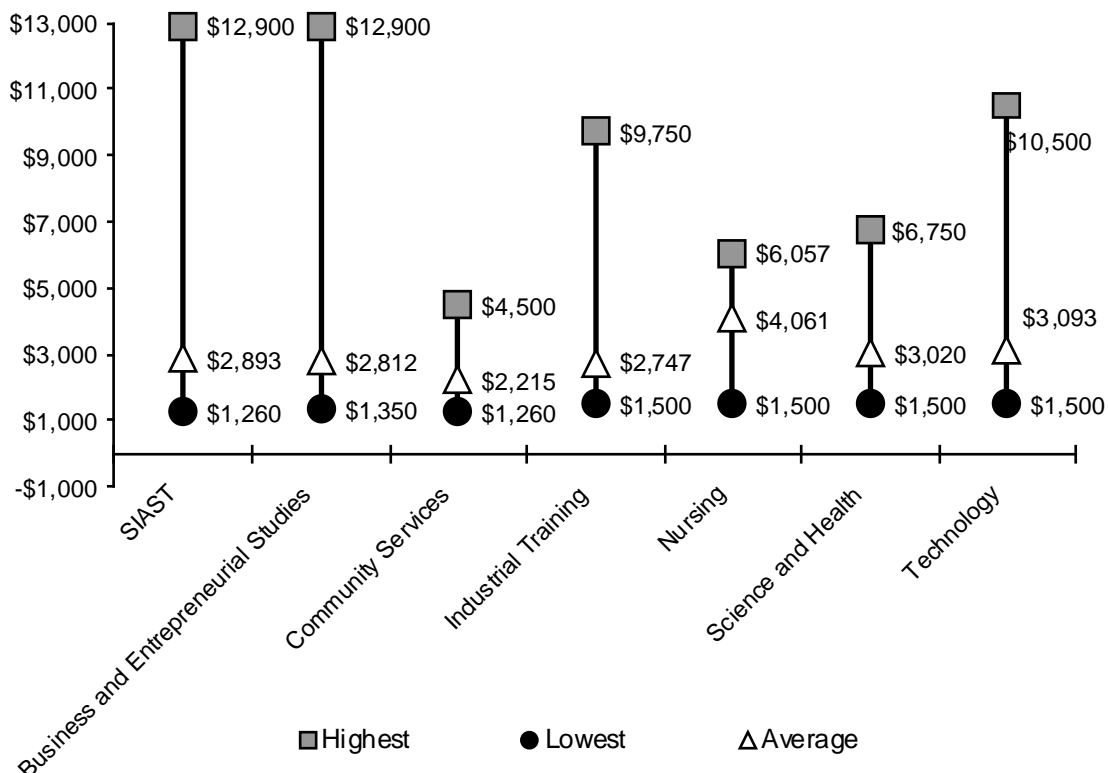

What is the hourly salary of your primary job before deductions? (Question 17)

The lowest wage reported by SIAST graduates was \$8.00 per hour. Based on a 37.5 hour work week, the minimum monthly salary for a full-time employee is \$1,200.00 [$\$8.00 \times 37.5 \times 4$]. The majority of SIAST employed respondents were paid at a higher level than this rate (Table 8). Three respondents, one in each of the business and entrepreneurial, technology, and industrial training divisions, recorded the highest monthly salaries for training-related employment, at \$12,900, \$10,500 and \$7,750, respectively (Figure 9). The average (mean) monthly full-time training-related salaries for all respondents were \$2,893, an increase of 3.3 percent over 2007.

Table 8: Monthly Salary of Full-Time Training-Related Job, and by Base/Continuing Education, 2008

	Total Employed	Highest	Average	Median	Lowest
Total SIAST Base Programs	951	\$10,500	\$2,857	\$2,699	\$1,343
Total SIAST CE Programs	484	\$12,900	\$2,983	\$2,700	\$1,260
OVERALL SIAST TOTAL	1,435	\$12,900	\$2,893	\$2,700	\$1,260

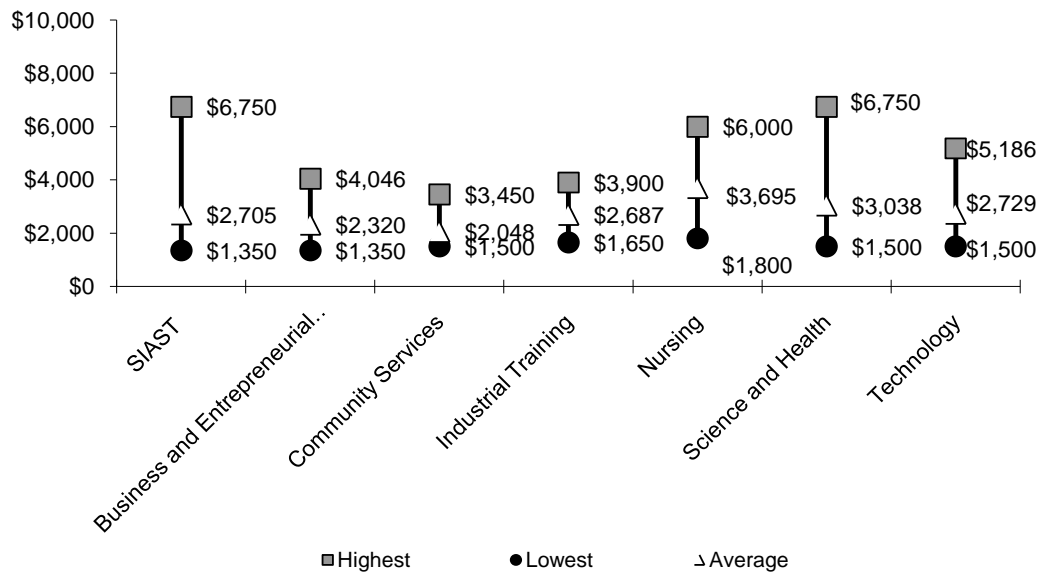

Figure 9: Monthly Salary of Full-Time Training-Related Employment, by Division (Base and Continuing Education Combined), 2008

3.2 Salaries for Aboriginal Respondents, Based on Number of Respondents

In all divisions, except for nursing, science and health, and technology, the average salary level for Aboriginal people employed in full-time training-related positions was lower than that reported for all SIAST respondents. The average monthly salary for Aboriginal people is highest in the nursing division, \$3,695, but is approximately 5 percent lower than that in 2007. However, the average salary received by graduates from nursing, \$3,695, and science and health, \$3,038, and technology, \$2,729 were well above the average monthly salary when compared to all SIAST aboriginal respondents (Figure 10).

Figure 10: Monthly Salary of Full-Time Training-Related Employment for Aboriginal Graduates by Division, 2008

4.0 Industry Sectors of Primary Employers

Saskatchewan Labour has identified the industry sectors listed below as important for the province. Monthly labour force statistics for the province are reported in this manner. The industry sector question was added to the survey in 2004 to determine if SIAST graduates were employed in one or more of these industry sectors. The question included in the survey was:

Please select the option below that best describes which industry sector your primary employer operates in. (Question 21)

The majority of SIAST respondents (31 percent) reported they work for employers who operate in the health industry while construction (10.9 percent) and education services (10.7 percent) were the second and third highest employers for SIAST graduates. Employment in the health industry was by far a large margin compared to other sectors such as the biotechnology industry at 0.7 percent and Film, Video, Multi-media, Printing and Publishing at 1.1 percent.

Table 9 provides a breakdown of industry sectors by division who employed SIAST graduates. The graduates in the nursing, and science and health programs are quite limited to the employments in the health sector (88.1 percent), while the respondents from other programs may be employed in a variety of industry sectors. For instance, in community services, respondents reported 45 percent employed in the educational services sector, 12.3 percent in human/social services and justice sectors.

The graduates from business and entrepreneurial studies were primarily employed in the Government Services and Public Administration business (21.5 percent), and business and professional services sector (18.1 percent), and the health services sector (11.8 percent) while the remaining distributed in other sectors.

The graduates of industrial training employed the same percent of 27.2 percent in construction and, transportation, Trucking, and Heavy equipment (includes aviation and automotive/auto body services) sectors. Approximately 17 percent of graduates from industrial training division was employed by Manufacturing (includes metal fabrication, agri-value, and food processing) sector.

In technology, respondents were clustered in the construction, 31 percent, and, 19.4 percent in technology, electronics and telecommunications sector and approximately 17 percent in natural resources and environment.

Table 9: Industry Sector of Primary Employer, by Division, 2008

5.0 Location of Employment, Based on Number Employed

There is always considerable interest by government officials and the general public to know if post-secondary graduates remain in the province for employment following graduation.

5.1 Location of Primary Employment for SIAST Respondents

Where is the location of your *primary* employment? (Question 18)

Note: The results in Section 5.1 provide the location of employment percentages based on the location of the graduates' *primary* employment not their training-related employment. Location of training-related employment percentages may be found in the *Graduate Employment Indicators* or the program pages at the end of this report.

As shown in Figure 11, over 95 percent of SIAST graduates were employed in Saskatchewan at the time of the survey, a 2 percent increase from the 2007 GES results.

The out-migration of graduates in the base program decreased to 4 percent in 2008 from 6 percent reported in 2007. The out-migration of graduates from continuing education program was 3 percent, a one percent decrease over 2007.

Figure 11: Location of Primary Employment, by Base/Continuing Education, 2008

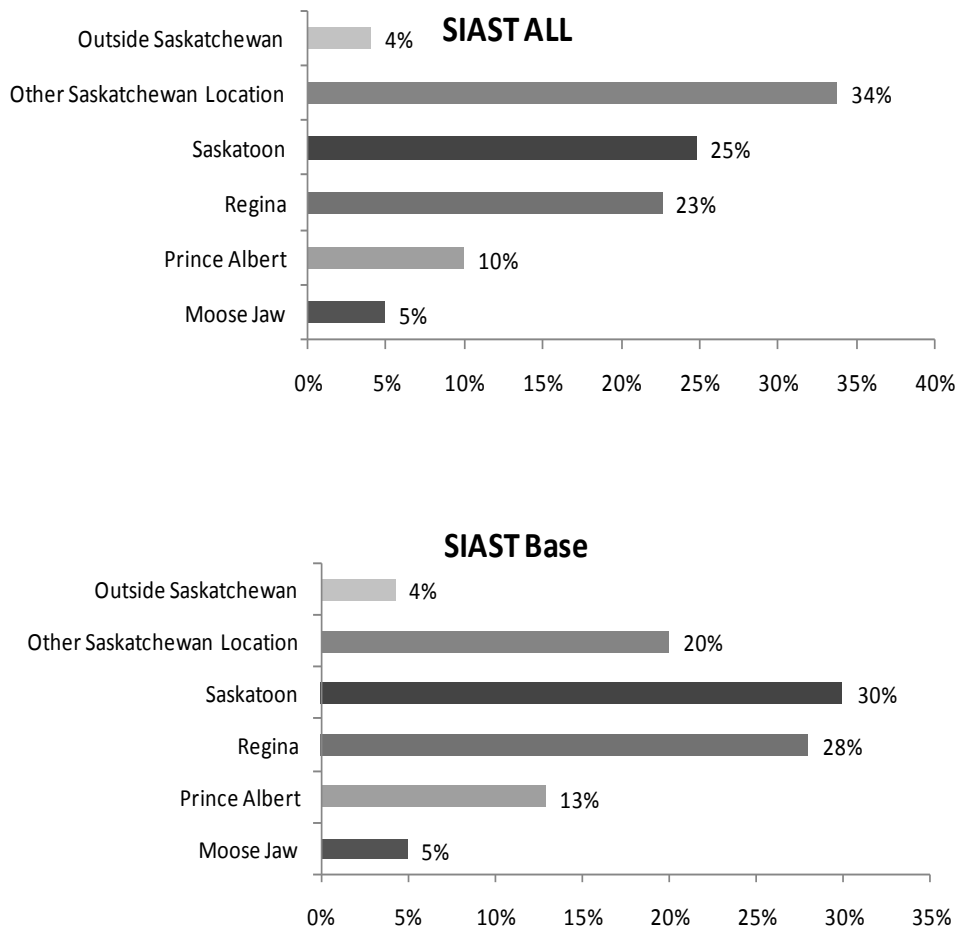

Figure 11: Location of Primary Employment, by Base/Continuing Education, 2008 (Continued)

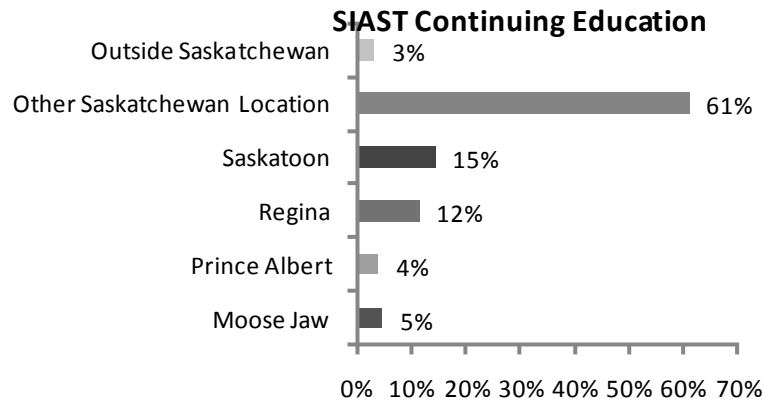

Table 10 provides a breakdown of SIAST graduates employment location, by division, by base and continuing education. The largest out-migration of graduates from base programs continues to be those from the science and health, 7 percent; technology, 6.5 percent; and nursing, 5.6 percent with an overall out-migration of 4.3 percent. This is a 1.7 percent decrease over 2007. In the continuing education programs, the graduates from nursing division had the largest proportion (4.8 percent) leaving Saskatchewan, an increase of 2.8 percent from 2007. Similar to base programs, over all out-migration of graduates from continuing education programs were also declined to 3.3 percent from its 4 percent in 2007. Overall, out-migration of SIAST graduates in 2008 declined to 4 percent from its 6 percent in 2007.

Table 10: Location of Primary Employment, by Division, by Base/Continuing Education, 2008

N: Base = 951 CE = 485	Regina	Saskatoon	Prince Albert	Moose Jaw	Other Sask. Location	Outside Sask.

OVERALL SIAST TOTAL	22.6%	24.8%	10%	4.9%	33.8%	4%

Consistent with the findings of the past surveys, the majority of respondents remain in Saskatchewan for employment. In 2007, the location percentages were:

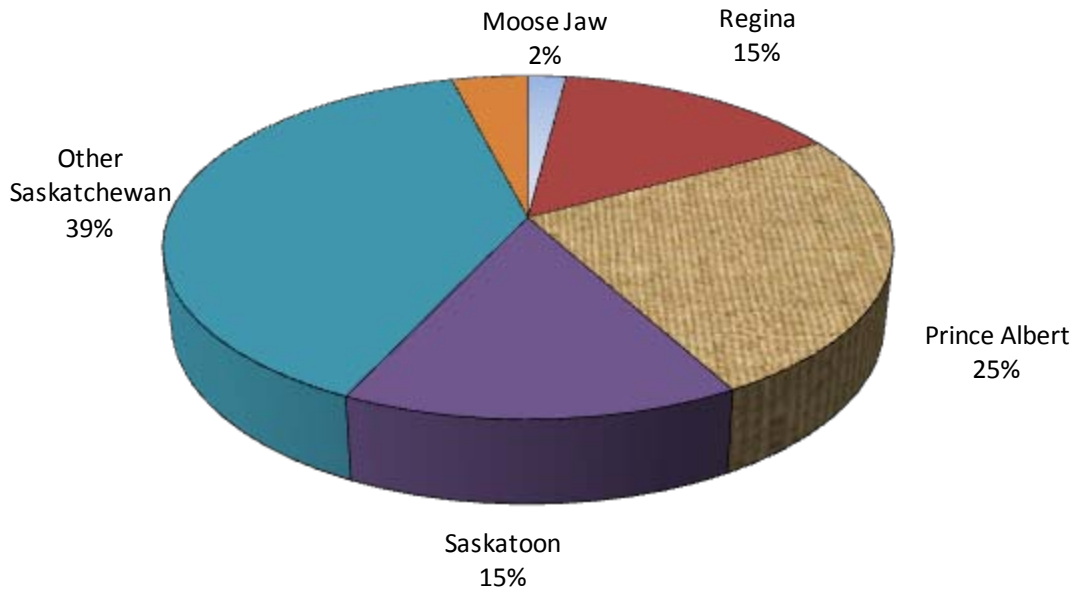

- Regina – 24%
- Moose Jaw – 4%
- Saskatoon – 27%
- Other Saskatchewan location – 34%
- Prince Albert – 6%
- Outside Saskatchewan - 6%

5.2 Location of Primary Employment for Equity Respondents

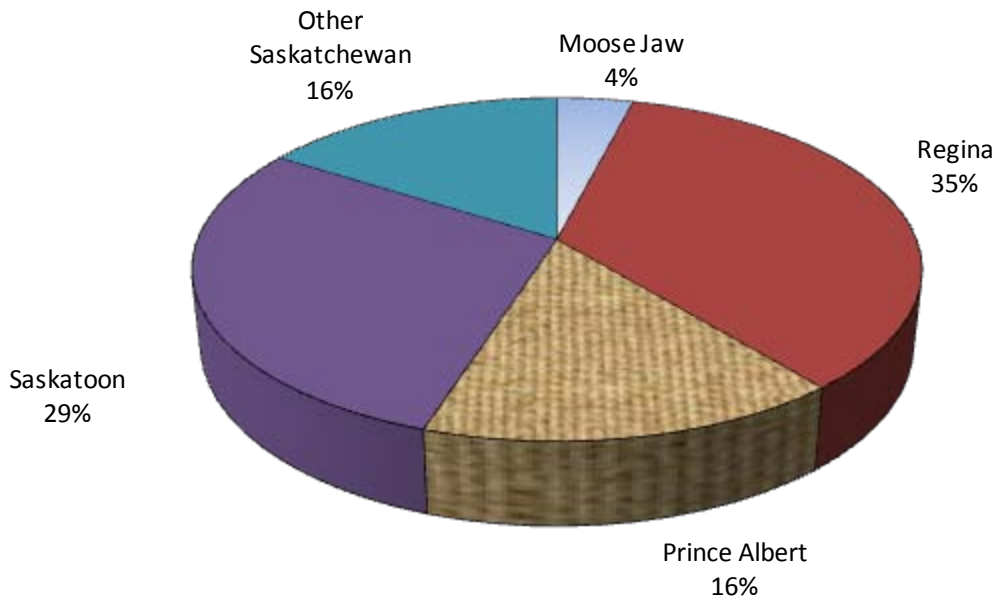

As shown in Figure 12, 96 percent of aboriginal graduate remained in Saskatchewan for employment. Only 4 percent of aboriginal graduates have moved out of province for employment, a 3 percent decline over 2007. Over one-third of Aboriginal graduates (39 percent) worked outside of major four cities in Saskatchewan. Approximately one-fourths of Aboriginal graduates employed in Prince Albert while 15 percent in Regina and another 15 percent in Saskatoon. Only 2 percent of Aboriginal graduates were employed in Moose Jaw.

Figure 12: Location of Primary Employment for Aboriginal, Persons with Disabilities and Visible Minority Respondents, 2008

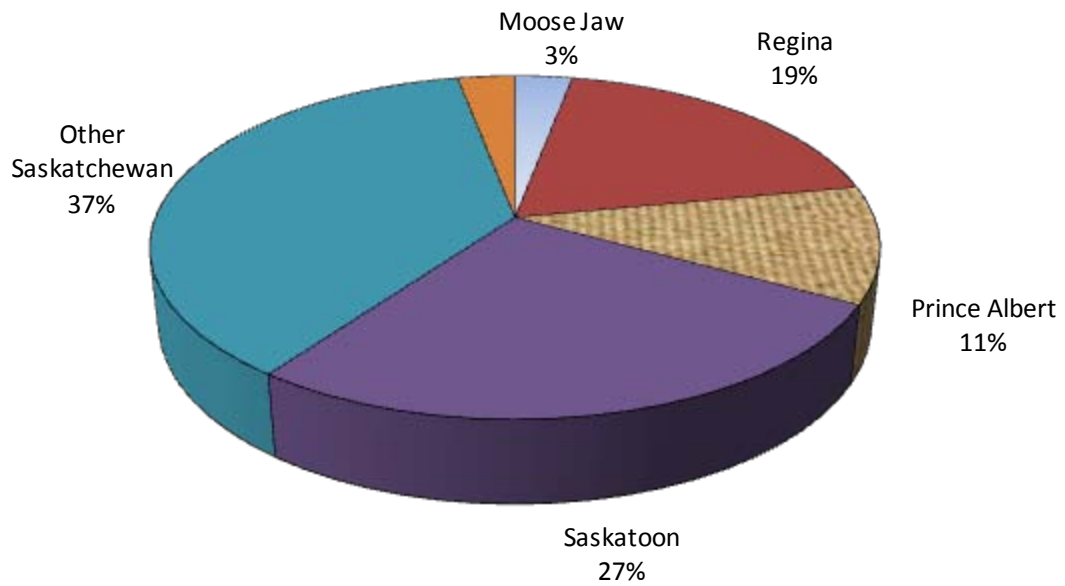

Aboriginal

Persons with Disabilities

Visible Minorities

5.3 Out-of-Province Employment for SIAST Respondents

If primary employment was found outside of Saskatchewan, was this by choice? (Question 19)

As mentioned before, approximately 4 percent (57 of 1435) of respondents indicated their location of employment as to outside Saskatchewan (Table 10). Of them, 89 percent (51 of 57) of the respondents who found employment opportunities out of Saskatchewan had indicated this was by choice (Table 11). Overall, graduates from the Science and Health, Community Services and Industrial Training divisions in both base and Continuing education programs found employment opportunities outside Saskatchewan but this is by choice.

Table 11: Primary Employment Out-of-Province by Choice, by Division, By Base/Continuing Education, 2008

	Total Respondents	% Out of Province Employed by Choice
SIAST Base Programs by Division		
Business and Entrepreneurial Studies	4	100%
Community Services	6	100%
Industrial Training	1	100%
Nursing	4	75%
Science and Health	13	100%
Technology	13	77%
Total SIAST Base Programs	41	90%
SIAST CE Programs by Division		
Business and Entrepreneurial Studies	3	100%
Community Services	3	100%
Industrial Training	4	100%
Nursing	1	0%
Science and Health	4	75%
Technology	1	100%
Total SIAST CE Programs	16	88%
OVERALL SIAST TOTAL	57	89%

Question 19 of the survey was to find out the reasons why they moved out-of-province for employment. That is:

“Please indicate the primary reason why you moved out-of-province for employment”.

Graduates were requested to identify the main reason they sought employment out-of-province. Overall, 39 percent indicated personal reasons for obtaining out-of-province employment. Almost the same rate of 20 percent of all respondents in both base and continuing education programs indicated they moved out-of-province to obtain more employment opportunities and better wages, while another 20 percent who moved out – of-province for employment did not provide any reason.

Note: The location of training related employment percentages may be found in the Graduate Employment Indicators or the program pages at the end of this report.

Table 12: Reason Primary Employment Out-of-Province, by Division, By Base/Continuing Education, 2008

	Total Respondents	More Employment Opportunities	Better wages	Personal reasons	Other

6.0 Applications and Interviews for Employment

6.1 Applications

How many employment opportunities have you applied for since completing your training program? (Question 7)

The effort that graduates had invested into obtaining employment, after graduation, was indicated by the number of applications that each had submitted and the number of interviews that each attended. These numbers are expressed as both means and medians, because medians, as the midway number, are not influenced by extreme responses.

As shown in Table 13, the average number of applications for employment that respondents in base programs had submitted ranged from 2 to 10, depending on the division, with an overall average of 5.8. The median number of applications ranged from 1 to 3, again depending on the division, with an overall average of 2. The respondents in business and entrepreneurial studies, and technology divisions in the base programs, consistent with the 2006 and 2007 survey, were at the high end of the range in applications (9.8 and 6.7 respectively), while respondents in nursing were at the low end of the range with an average of 2.9 applications. The average number of applications from the graduates from industrial training was 6.5, a 2.5 percent increase over 2007.

The average number of applications for employment that respondents in continuing education programs submitted ranged from 1 to 7, depending on the division, with an overall average of 5. The median number of applicants ranged from 1 to 3, again depending on the division, with an overall average of 2. Technology, business and entrepreneurial studies and industrial training respondents in the continuing education programs were at the high end of the range in applications (7, 5.6 and 4.5, respectively), while respondents in nursing (1.3), and science and health (2.7) were at the low end of the range of applications with an average of 2 applications.

6.2 Interviews

How many employment interviews have you had? (Question 9)

There was little variation in the number of interviews in which respondents participated. The mean number of interviews for respondents in base programs ranged from 2 to 3, while the median number of interviews ranged from 1 to 2. Similar findings were reported for respondents in SIAST continuing education programs.

Table 13: Employment Applications and Interviews: Average, Mode, and Median, by Division, by Base/Continuing Education, 2008

	Applications			Interviews		
	Average	Mode	Median	Average	Mode	Median

OVERALL SIAST TOTAL	5	1	2	2	1	1

7.0 Not Employed

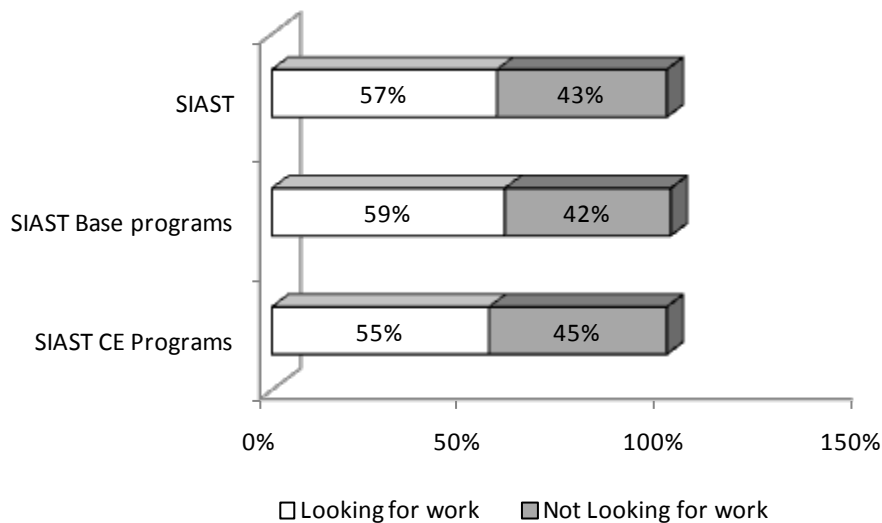

While it is important to determine the percentage of graduates who obtain employment after graduation, it is also equally important to know about those who were not employed at the time the survey was conducted. Respondents who had indicated that they were not presently employed were asked to complete a series of questions regarding their activity since graduation.

7.1 Actively Looking for Work

Are you actively looking for work at present? (Question 26)

Overall, 57 percent of the respondents who were not employed at the time of the survey indicated that they were looking for work. Figure 13 illustrates that a slightly higher proportion of respondents who were not employed from base programs were more likely to be looking for work, than their peers in continuing education programs (59 percent compared to 55 percent in continuing education programs).

Figure 13: Graduates Not Employed but Looking for Work, by Base/Continuing Education, 2008

7.2 Employed Since Graduating from SIAST

The following questions were directed toward those respondents who indicated that they were not employed at the time of the survey.

Have you worked at all (full-time, part-time, or casual) since completing your training program? (Question 23)

If yes, was the most recent work directly related to the education and training you received in your program? (Question 24)

Are you scheduled to return to work in the future? (Question 25)

Of the 205 respondents who were not working at the time they were surveyed, 71 percent (145 of 205) indicated that they had worked at some point since completing their training program. Sixty-five percent of those graduates (94 of 145) who responded to question indicated they were scheduled to return to work at some point in the future.

Of the respondents not working at the time of the survey, but who had worked at some point since completing their training, sixty-five percent (94 of 145) indicated they had worked in training-related jobs.

Table 14 provides a breakdown, by division and by base and continuing education programs, of respondents' work experiences since graduation.

Table 14: Graduates not Employed - Work Experience since Graduation, by Division, By Base/Continuing Education, 2008

	Have worked since completion of training	Work directly related to training received	Scheduled to return to work

² Number of respondents in the base programs = 130

³Number of respondents in the CE programs = 75

7.3. Not Actively Looking for Work:

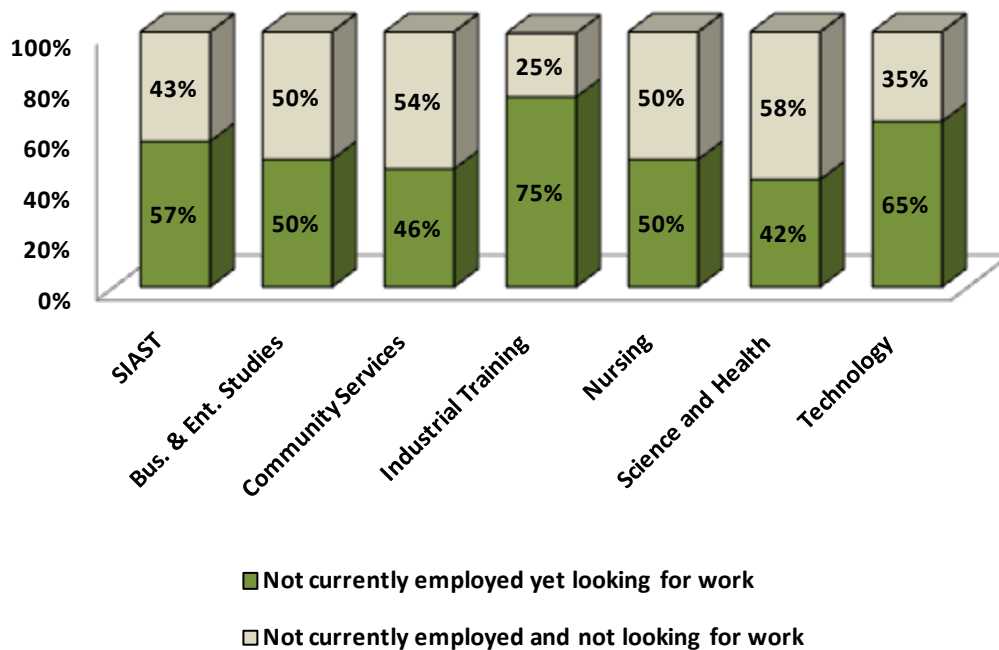

Are you actively looking for work? (Question 25)

Of the 1,640 survey respondents, 12.5 percent (205 of 1,640) reported they were **not employed and were not looking for work**, primarily because they were either returning for further education or personal reasons.

Section 7.4 of the report identified why some of the unemployed respondents are not actively looking for work. Only one respondent in the nursing division who were not currently employed (1 of 2) were not looking for work due to personal reasons. The science and health division had the highest proportion of respondents who were not actively looking for work (58 percent not employed and not looking for work), followed by the community services division at 54 percent (Figure 14).

The employed (1,435) and the unemployed respondents who stated that they were looking for work (117) represent the SIAST-wide respondent **available workforce (1,552)** (those respondents who are available to work).

Figure 14: Graduates Not Actively Looking for Work, by Division, 2008

7.4 Reasons not currently employed

Which of the following best describes the reason why you are currently not employed? (Question 26)

The two most common reasons given by unemployed respondents for not being employed at survey time were *returned for further education* (33 percent) and *personal reasons* (25 percent). Table 15 provides a breakdown of the reasons respondents were not employed at the time of the survey by division, and by base and continuing education programs.

Table 15: Graduates Not Employed- Reason Not Employed, by Division, Base/Continuing Education, 2008

* Only 2 respondents in base programs in the Nursing Division were unemployed.

8.0 Further Education or Training

The survey formally asked all respondents if, at the time of the survey (whether employed or not), they were enrolled in further education or training.

8.1 Respondents in Further Education or Training

Are you currently enrolled in an education or training program? (Question 28)

Eighteen percent of all SIAST respondents, whether employed or not, reported that they were continuing their education at the time of the survey. This is a decrease of 4 percent over the 2007 response. The largest percentages of respondents enrolled in further education came from base programs in the community services (26 percent) and industrial training division (26 percent) and business and entrepreneurial studies (23 percent) in the continuous education division.

Table 16: Graduates Currently Enrolled in Further Education or Training, by Division, by Base/Continuing Education, 2008

8.2 Type of Further Education or Training

Which type of training is it? (Question 28)

As shown in Figure 15, 49 percent of respondents (145 of 299) who were taking additional education or training at the time of the survey were enrolled in programs at SIAST, either the same SIAST program or a different SIAST program altogether, which is the same rate observed in 2007. Twenty percent of respondents continuing their education were enrolled in apprenticeship training programs while 14 percent of respondents were enrolled in university program. Another 5 percent of respondents were enrolled in post-secondary program at another institute.

Table 17 provides a breakdown by division and by Base and continuing education programs of the type of training the respondents were enrolled in after graduation from SIAST.

Figure 15: Type of Further Training, by Division, SIAST Overall, 2008

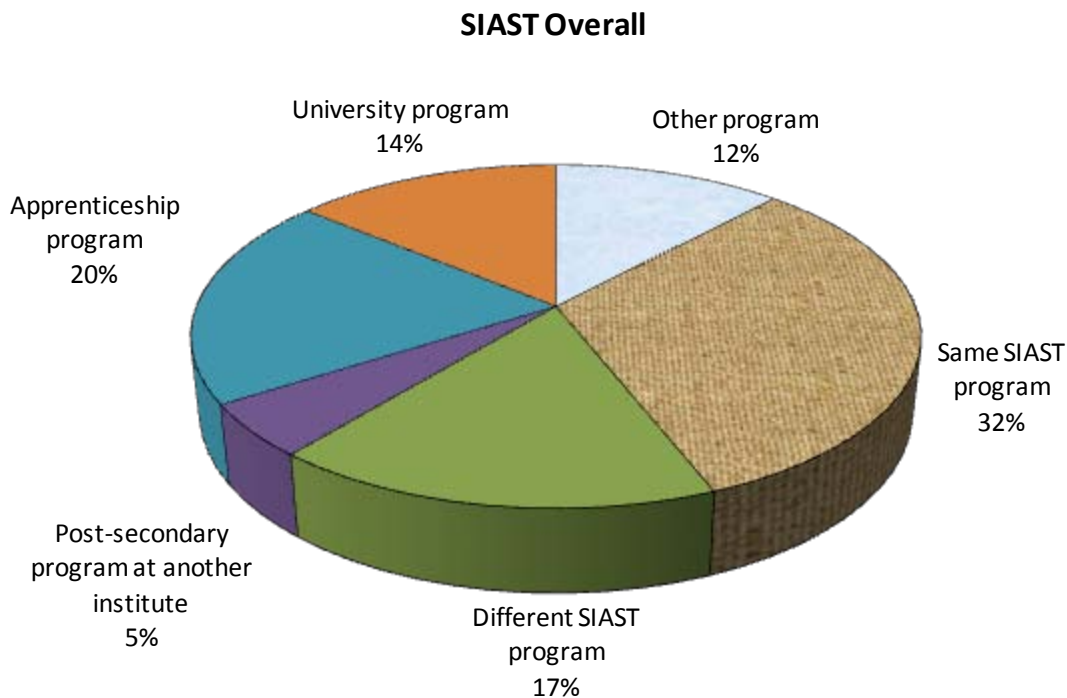

Table 17: Type of Further Training, by Division, by Base/Continuing Education, 2008

9.0 Program Completion

Which of the following best describes your reason for completing this program? (Question 4)

Overall, majority of respondents (59 percent) indicated the reason for completing training was to obtain *employment in a specific field*. However, *change of career* and *updating job skills* were reasons given at 13 percent and 10 percent of respondents respectively. Table 18 below indicates the further break down for reasons for completing SIAST programs by divisions.

Table 18: Reason for Completing SIAST Program, by Division, by Base/Continuing Education, 2008

	Total Respondents	Employment in the field	Upgrade job skills	New skills for Change of carrier	Entry into higher post sec. training	Employer Requirement	Sponsored to take training	Personal Reasons

10.0 Program Assessment

Respondents were asked to assess the overall quality of the program(s) they studied at SIAST and the ability of the training to prepare them for employment.

10.1 Quality of Program

Please rate the overall quality of the training you received in your program. (Question 5)

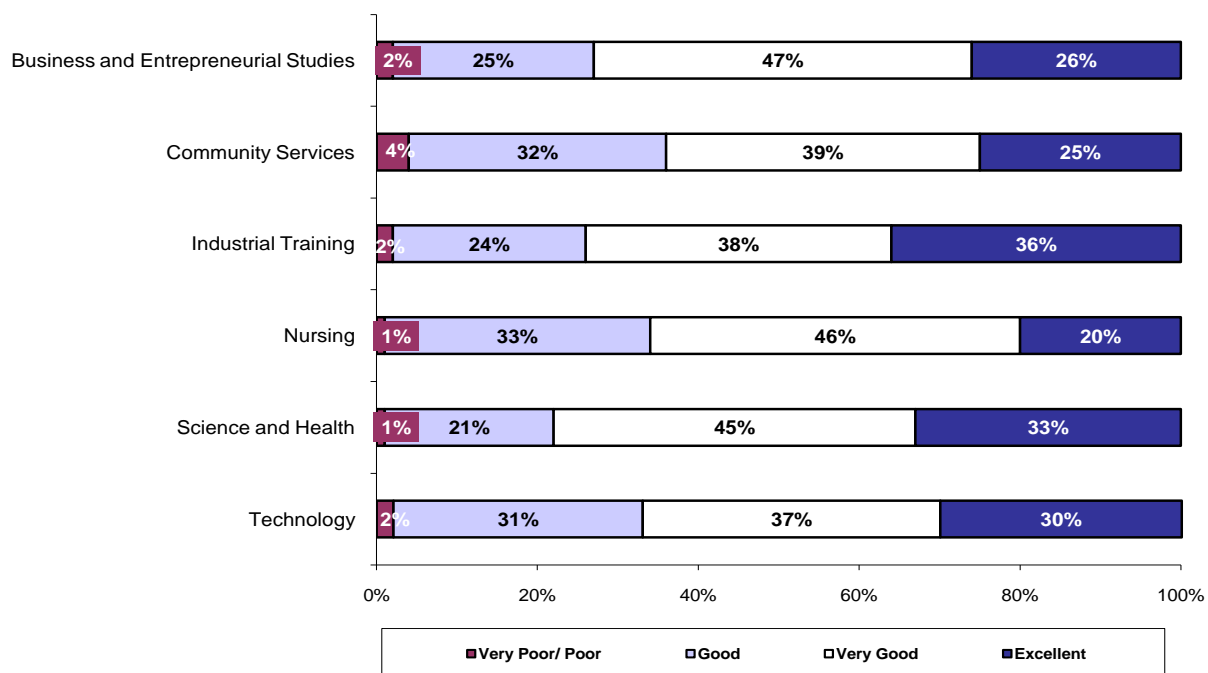

Consistent with the responses in past employment surveys, respondents continue to feel that SIAST provides high quality training. Ninety-nine percent of all SIAST respondents to the survey rated the quality of their training they received as good to excellent (Table 19). The same rate of 98 percent of respondents from both base and continuing education programs rated the quality of training they received was good to excellent.

Table 19: Overall Quality of Training, by Base/Continuing Education, 2008

	Total Respondents	Excellent	Very good	Good	Poor	Very poor
Total SIAST Base Programs	1,081	28%	42%	28%	1.4%	0.5%
Total SIAST CE Programs	559	32%	41%	25%	1.1%	0.9%
OVERALL SIAST TOTAL	1,640	30%	42%	27%	1%	0.6%

Figure 16 provides a breakdown of quality of training indicated by respondents by division. The nursing and science and health studies programs received the most favourable ratings from respondents.

Figure 16: Overall Quality of Training, by Division, 2008

10.2 Training Preparedness for Employment

Please rate how well the training program prepared you for employment in your field of study. (Question 6)

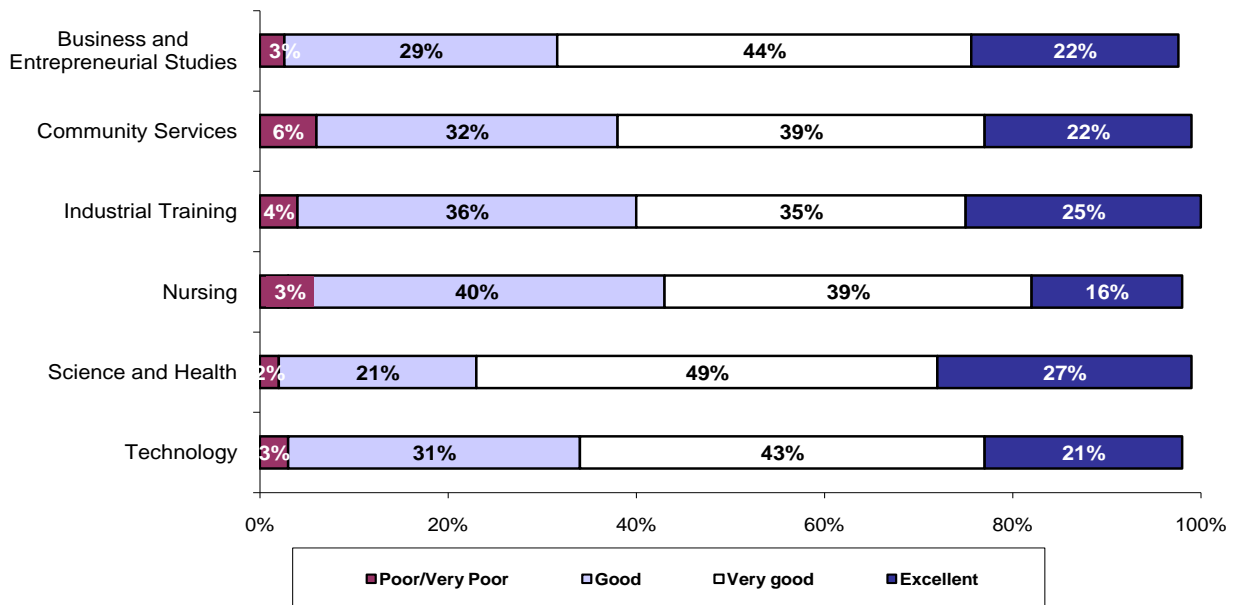

Overall, 96 percent of respondents indicated that the ability of their training to prepare them for employment in their field of study was good to excellent (Table 20), with the majority of the rating (65%) being in the very good to excellent range.

Table 20: Training Prepared for Employment in Field of Study, by Base/Continuing Education, 2008

	Total Respondents	Excellent	Very good	Good	Poor	Very poor
Total SIAST Base Programs	1,081	22%	43%	32%	2%	1%
Total SIAST CE Programs	559	26%	41%	27%	4%	1%
OVERALL SIAST TOTAL	1,640	23%	42%	30%	3%	1%

Figure 17 provides a breakdown of employment preparation by division. The majority of respondents in all divisions rated the training they received to prepare them for employment between excellent and very good.

Figure 17: Training Prepared for Employment in Field of Study, by Division, 2008

11.0 Demographics

SIAST has a mandate to increase its equity participation both in staffing and students. The Saskatchewan Human Rights Commission permits SIAST to ask participant equity questions. With an education equity policy, the demographics section of the survey is very relevant to SIAST.

11.1 Gender of all Respondents

Identify your gender. (Question 30)

SIAST-wide, there continues to be more female respondents than male, and the composition changes depending on the base and continuing education programs. Among respondents of base programs, the split was 54/46 percent female/male, while among respondents of continuing education programs, the ratio was 63/37 percent, female/male. Overall, 57 percent of SIAST respondents were female and 43 percent male. In the 2007 study, the SIAST-wide breakdown was 58 percent female and 42 percent male. Gender, as with other equity factors, is a self declaration.

Table 21: Gender, by Division, by Base/Continuing Education, 2008

	Total Respondents	Male	Female
SIAST Base Programs by Division			
Business and Entrepreneurial Studies	189	24%	76%
Community Services	228	23%	76%
Industrial Training	172	92%	8%
Nursing	73	10%	86%
Science and Health	196	23%	77%
Technology	223	82%	18%
Total SIAST Base Programs	1,081	46%	54%

Nursing	21	10%	91%
Science and Health	166	8%	92%
Technology	49	90%	10%
Total SIAST CE Programs	559	37%	63%
OVERALL SIAST TOTAL	1640	43%	57%

Figure 18: Gender by Base/Continuing Education, 2008

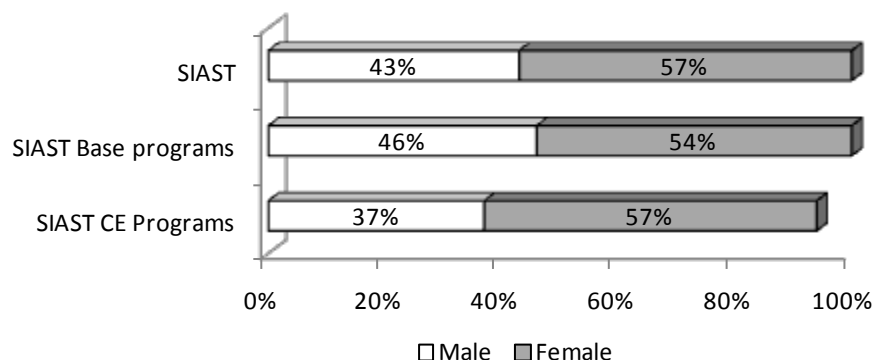

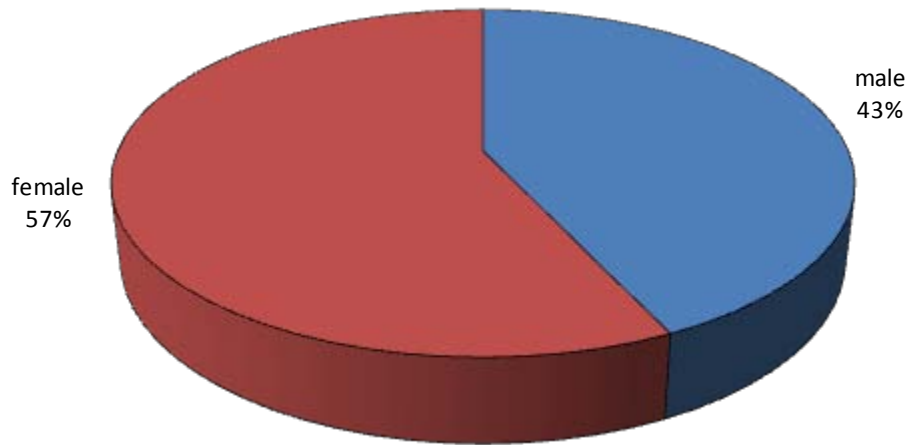

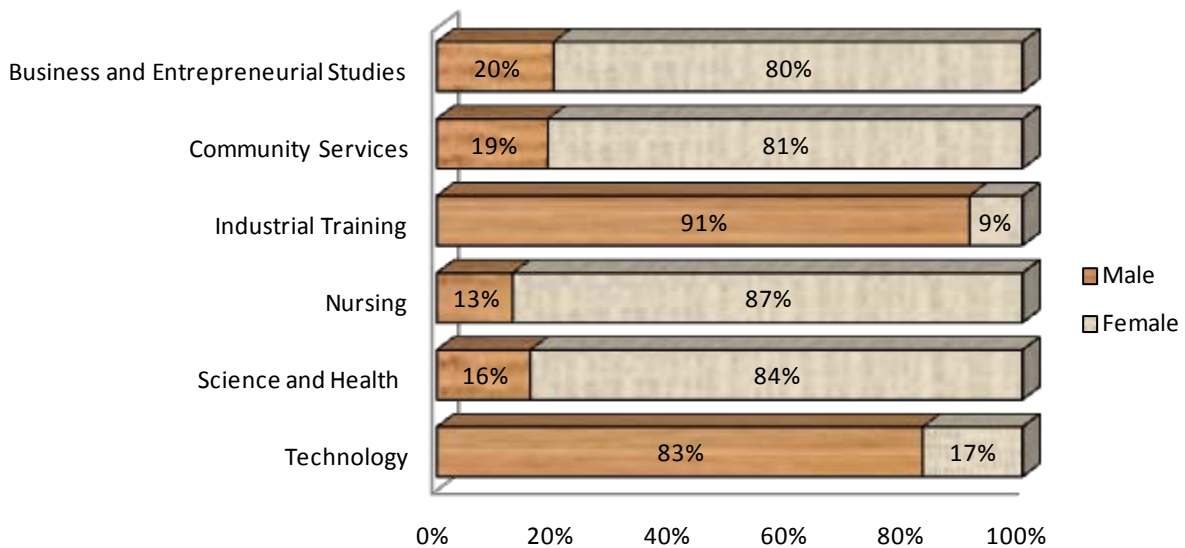

Figure 19: Gender Overall, 2008

When analysis by industry type, overall, respondents in the industrial training and technology divisions had the largest percentage of males (91 percent and 83 percent respectively) whereas the nursing division had the largest percentage of females (87 percent). The program mix in the above mentioned three divisions were most likely a factor in the gender differences. For example, programs in the industrial training division are traditionally male dominated, whereas the nursing division is traditionally dominated by females.

Figure 20: Gender by Division, 2008

11.2 Ages of all Respondents

How old were you on June 30th, 2008? (Question 31)

As shown in Table 22, the average age of SIAST graduates was 29 years, while the median age was 24 years. Respondents of continuing education programs were significantly older (with the mean and the median age at 33 and 31 years of age, respectively) than the base program respondents, whose mean and median ages were 26 and 23, respectively.

Among divisions, there was little diversity in the mean age of respondents in base programs, except for respondents in nursing division programs, whose average age was substantially higher at 35 years. This is consistent with the results in 2007. Also, the continuing nursing cluster of programs is part of the nursing division. The participants of these programs have been out working in the field prior to returning to SIAST for additional training. Most of the Continuing Nursing programs are offered through base programming which raises the age level for the nursing division.

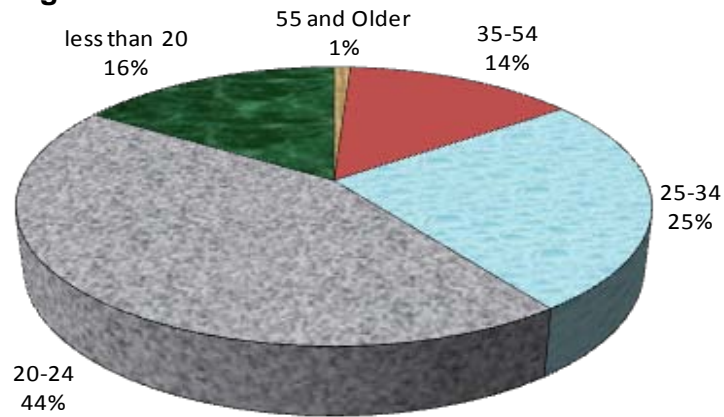

In SIAST continuing education programs, respondents in the nursing division had the highest mean age at 43 years. In this division, significantly large number of participants taking the Continuing Care Assistant program through continuing education. The majority of participants have been out working in the field and attending SIAST for credentialing and they are older in age. Figure 21 further illustrate the distribution of respondents among divisions by age.

11.3 Aboriginal Ancestry

Are you of Aboriginal ancestry? (Question 31)

The definition of Aboriginal refers to those persons who are First Nations (Registered, Treaty, or Status Indians), Non-status Indians, Métis and Inuit. Equity status is a self declaration. Of the graduates who responded to the survey, 14 percent (226 of 1,640) indicated that they were of Aboriginal ancestry.

Among the divisions, the nursing division had the highest percentage of respondents (25 percent) with an Aboriginal ancestry, followed by the community services division (16 percent). Figure 22 illustrate the percentage of Aboriginal and non-Aboriginal respondents in each division.

Figure 22: Aboriginal Ancestry Identification, by Division, 2008

Aboriginal Category

Do you consider yourself Status/Treaty Indian, Métis, Non-Status Indian or Inuit? (Question 33)

The majority of Aboriginal respondents indicated that they were Métis (55 percent) or Status/Treaty Indian (40 percent), while the Non-Status group made up 5 percent (Table 23).

Table 23: Identified Ancestry Type, by Division, by Base/Continuing Education, 2008

11.4 Visible Minority Declaration

Do you consider yourself a member of a visible minority? (Question 34)

Respondents were given the opportunity to identify if they were members of a visible minority. The definition of visible minority includes those who are visibly distinguishable from the majority of Canadians on the basis of race or ethnic origin. It does not include those declaring Aboriginal ancestry. As shown in Table 24, overall, visible minority respondents increased to 9 percent from 7 percent in 2007 while higher percentage of respondents were from continuing education programs.

Table 24: Visible Minority Identification, by Division, by Base/Continuing Education, 2008

11.5 Persons with Disabilities Declaration

Do you consider yourself a person with a disability? (Question 35)

Respondents were given the opportunity to indicate if they were persons with disabilities. The definition of a person with a disability includes any person with an ongoing physical, mental, psychiatric, learning or sensory disability that is caused by bodily injury, birth defect or illness.

In this survey, 4 percent of respondents indicated that they had a disability, a 2 percent decrease over 2007. However, the higher percentage of disabled respondents in both base and continuing education programs in community services division.

Table 25: Persons with Disabilities Identification, by Division, By Base/Continuing Education, 2008

	Total Respondents	Disabilities Identification
SIAST Base Programs by Division		
Business and Entrepreneurial Studies	189	4%
Community Services	228	9%
Industrial Training	172	4%
Nursing	72	3%
Science and Health	196	4%
Technology	222	4%
Total SIAST Base Programs	1079	3%
SIAST CE Programs by Division		
Business and Entrepreneurial Studies	104	0%
Community Services	77	7%
Industrial Training	142	3%
Nursing	21	0%
Science and Health	166	4%
Technology	49	4%
Total SIAST CE Programs	559	3%
OVERALL SIAST TOTAL	1638	5%

Respondents were asked to provide general comments at the end of the survey regarding SIAST's programs and services. The comments were distributed to all SIAST deans and management for their review and consideration.

APPENDICES

APPENDIX A: PROGRAM CHANGES

Revisions to the following programs were recently approved. Some revisions were effective immediately and other revisions not effective until the 2007-08 academic year.

Division/Program Name	Change
Business and Entrepreneurial Studies	
Business Accountancy Specialty (Diploma)	Program retitled Business Accountancy
Business Computer Information Systems (Diploma)	Program retitled Business Information Systems
Business Financial Services Specialty (Diploma)	Program retitled Business Financial Services
Computer Information Systems (diploma)	Program retitled Business Information Systems
Computer Office Assistant (Advanced Certificate, Wascana and Woodland)	Program Suspension effective July 1, 2008
Human Resources (Certificate)	Program retitled Human Resources Management
Community Services	
Advanced Additions Counselling (Advanced Certificate)	Program deleted –effective July1, 2008
Economic Development Officer (Certificate)	Program deleted
Grains Inspection (Applied Certificate)	Program deleted
School Secretary (Advanced Certificate)	Program deleted
Industrial Training	
Class 5 Driving Instructor (Applied Certificate)	Program deleted December 1, 2007
Electronics Service Technician (Advanced Certificate, Palliser)	Program deleted June 30, 2007
Office Systems Technician (Advanced Certificate, Woodland)	Program deleted June 30, 2007
Outdoor Power Equipment Technician (OPET) Marine and Lawn Garden (Certificate)	Program suspension effective July 1, 2008
Science and Health	
Gerontological Nursing/LPN advanced certificate	Program suspended-effective July 1, 2007
Gerontological Nursing/RPN advanced certificate (Wascana)	Program deleted
Nursing Education Program of Saskatchewan (NEPS) (Diploma)	Program deleted
Technology	
Electrician	Credential changed from certificate to applied certificate

GENERAL INFORMATION

Q1 What is the full name of the program from which you graduated?

Q2 What is the name of the credential that you received? **(SELECT ONLY ONE)**
_____ Applied Certificate _____ Certificate _____ Advanced Certificate _____ Diploma

Q3 At which SIAS campus or regional college did you take your program?
_____ Kelsey
_____ Palliser
_____ Wascana
_____ Woodland
_____ Regional College or Other Provider (including online), **specify** _____

Q4 Which of the following **best** describes your reason for completing this program? **(SELECT ONLY ONE)**
_____ Employment in this field interested me
_____ To upgrade or formalize training in field
_____ To change careers
_____ To gain entry into higher level of post-secondary training
_____ Employer requirement
_____ Sponsored to take training (i.e., disability/workers compensation, unemployment, etc.)
_____ Personal reasons

Q5 How satisfied were you with the overall quality of training you received in your program?
_____ Very Dissatisfied _____ Dissatisfied _____ Somewhat Satisfied _____ Satisfied
_____ Very Satisfied

Q5b. If you not satisfied with the overall quality of training you received in your program, provide a brief comment on what SIAS might do to improve the training.

Q6 How satisfied were you with the ability of the training to prepare you for employment in your field of study?
_____ Very Dissatisfied _____ Dissatisfied _____ Somewhat Satisfied _____ Satisfied
_____ Very Satisfied

Q6b. If you were not satisfied with the ability of the training to prepare you for employment in your field of study, provide a brief comment on what SIAS might do to improve the training.

Q7 How many employment opportunities have you applied for since completing your training program (enter '0' if you have not applied for any jobs)? _____

Q8 If none, why have you not applied for any employment opportunities?
_____ Already employed in field of training while enrolled in program
_____ Offered employment during practicum
_____ Personal reasons
_____ Other, please specify: _____

Q9 How many employment interviews have you had? _____

Q10 Are you presently employed?
_____ Yes (**CONTINUE TO Q11**) _____ No (**GO TO Q22**)

EMPLOYMENT INFORMATION – IF YOU ARE PRESENTLY EMPLOYED, COMPLETE Q11-21. IF NOT, GO TO Q22

Q11 Are you self-employed?
_____ Yes _____ No

Q12 Are you employed in a job directly related to the education and training you received in your program at SIAST?
_____ Yes _____ No

Q13 How many jobs do you currently have? (Enter 0 if you are not employed in a particular category below)
_____ # of Training Related Jobs
_____ # of Non-training Related Jobs

INSTRUCTIONS FOR QUESTIONS 14 to 21:

- For those respondents who are employed in more than one training related job, provide your answers based on the one you consider to be your 'primary job'.
- For those respondents who are not employed in a training related job, provide your answer based on the non-training related job you consider to be your 'primary' job.

Q14 What is the title of your primary training related job? (If you do not have a training related job, provide the title of your primary non-training related job)

Q15 What is your employment status in your primary training related job? (If you do not have a training related job, provide the employment status of your primary non-training related job)
_____ Permanent Full-time (30 hours or more per week)
_____ Permanent Part-time (less than 30 hours per week)
_____ Non-permanent full-time (i.e., term, contract, seasonal)
_____ Non-permanent part-time (i.e., term, contract, seasonal)
_____ Casual

Q16 If your primary job is a part-time or casual position, is this by choice?

- Yes
- No
- Not Applicable

Q17 What is the hourly salary of your primary training related job, before deductions? *(If you do not have a training related job, provide your salary for your primary non-training related job)*

- a. \$_____ /hour
- b. If your hourly rate is unknown, provide an average monthly salary \$_____ /month

Q18 Where is the location of your primary training related employment? *(If you do not have a training related job, provide the location of employment for your primary non-training related job)*

- Moose Jaw Prince Albert Regina
- Saskatoon
- Other Saskatchewan location, please specify nearest community _____
- Outside Saskatchewan, please specify province, or country (if outside Canada): _____

Q19 If employment was found outside of Saskatchewan, was this by choice?

- Yes No Not applicable (**GO TO Q21**)

Q20 Indicate the **main** reason why you moved out-of-province for employment (**SELECT ONLY ONE**)

- More employment opportunities (i.e., not finding desired employment in Saskatchewan right away or at all)
- Better wages and benefits
- Personal Reasons (includes permanent place of residence out of province)
- other, specify _____

Q21 Select the option below that **best** describes which industry sector the employer for your primary training related employment operates in. *(If you do not have a training related job, provide the industry sector the employer for your primary non-training related position operates in)*
(**SELECT ONLY ONE**)

- Biotechnology, Pharmaceuticals or Nutraceuticals
- Business and Professional services
- Construction
- Education Services
- Film, Video, Multi-media, Printing and Publishing
- Finance, Insurance, Real estate
- Government Services/Public Administration
- Health
- Hospitality and Tourism (includes casinos)
- Human/Social Services and Justice
- Manufacturing (includes metal fabrication, agri-value, and food processing)
- Natural Resources and Environment (includes agriculture, forestry, mining, oil & gas)
- Retail and Wholesale
- Technology, Electronics and Telecommunications
- Transportation, Trucking, and Heavy equipment (includes aviation and automotive/autobody service) (**CONTINUE TO Q28**)

GRADUATES NOT EMPLOYED – IF YOU ARE NOT CURRENTLY EMPLOYED, COMPLETE Q22-27.

- Q22** Which of the following **best** describes the reason why you are currently not employed? (**SELECT ONLY ONE**)
- Returned for further education
 - No employment opportunities (includes in desired location or in field of study, or due to seasonality of work)
 - Lack of experience
 - Quit employment or lost desire to work in field
 - Laid off by employer (includes term or seasonal work)
 - Personal reasons (i.e., not available to work - family, health/disability, age, relocation, etc.)
- Q23** Have you worked at all since completing your training program (includes part-time or casual positions)?
 Yes No (**GO TO Q25**)
- Q24** If yes, was the most recent work directly related to the education and training you received in your program?
 Yes No
- Q25** Are you scheduled to return to work in the future?
 Yes No
- Q26** Are you actively looking for work at present?
 Yes No
- Q27** Which of the following best describes your reason for not looking for work?
- Returned for further education
 - Given up looking - no employment opportunities (includes in desired location or in field of study or due to seasonality of work)
 - Personal reasons (i.e., not available to work due to family, health/disability, age, relocation, etc.) (**CONTINUE TO Q28**)

FURTHER EDUCATION – ALL GRADUATES TO COMPLETE Q28 AND Q29, WHETHER PRESENTLY EMPLOYED OR NOT

- Q28** Are you currently enrolled in an education or training program?
 Yes No (**GO TO Q30**)
- Q29** Which type of training is it? (**SELECT ONLY ONE**)
- The same SIAST program (different credential)
 - A different SIAST program
 - A post-secondary program at another institute (other than university)
 - An apprenticeship program
 - A university program
 - Other program, specify _____

DEMOGRAPHICS

- Q30** Identify your gender
- Male
 - Female
- Q31** How old were you on June 30th, 2007? _____
- Q32,** Are you of Aboriginal ancestry?

Yes
 No (**GO TO Q34**)

Q33 If YES, do you consider yourself?
 Status/Treaty Indian
 Métis
 Non-Status Indian
 Inuit

Q34 Do you consider yourself a member of a visible minority? Yes No

The definition of a visible minority is: A group of persons, with the exception of Aboriginal people, who are visibly distinguishable from the majority of Canadians on the basis of race, religion, and skin colour, national or ethnic origin.

Q35 Do you consider yourself a person with a disability? Yes No

The definition of a person with a disability is: any person with an ongoing physical, mental, psychiatric, learning or sensory disability that is caused by bodily injury, birth defect or illness.

PLEASE ADD ANY ADDITIONAL COMMENTS THAT YOU WISH TO MAKE:

Graduate Contact Information

Please provide the contact information below, so that we may enter you into the graduate employment survey prize draws and contact you if you are a winner, as well as to confirm your participation in the survey to prevent follow-up calls. Note this information will not be used to identify individual responses. **Your feedback will remain confidential.** Your contact information will also not be shared with other parties without your permission.

Providing this information is optional, however, we will not be able to enter you into the draw for prizes if it is not given. **Graduates who submit a completed survey by the early bird deadline of January 31, 2009 will be entered to win one of three prizes – your choice of either an 8GB MP3 player or a 10 MP digital camera – in addition to being entered in the grand prize draw. All graduates who complete the survey by the final deadline of March 31, 2009 will be entered to win the grand prize of a 17” wireless Base 2 Duo processor 2GB laptop.**

SIAST Alumni Association

SIAST's Alumni Association is interested in maintaining contact and providing services to SIAST graduates. Do we have your permission to share your contact information with them?

Yes _____ No _____

SIAST Employer Survey

Provide Employer Contact Information and be entered to win one of three \$250 gift certificates to Future Shop!!

In order to obtain feedback on how well SIAST is preparing graduates for the labour market, we will also be contacting employers in the spring of 2009. The survey is general in nature and will focus on SIAST's ability to deliver the appropriate mix of program curriculum, instruction, and delivery methods required by employers, as well as general job related and employability skill requirements.

Please assist us in reaching the appropriate employers by providing your employer's contact information below.

Graduates who provide *accurate up-to-date* employer contact information will be entered to win one of three \$250 gift certificates to Future Shop. Note: you must have also provided your own contact information above in order for us to contact you in the event your name is drawn.

Company name:

Company street address: _____

City: _____ Postal Code: _____

Name of supervisor: _____ Title: _____

Thank you for completing this questionnaire.

APPENDIX C: 2008 SIAST GRADUATE EMPLOYMENT SURVEY – TOTAL RESPONSES PER QUESTION

The total number of graduates responding to each question varied because:

- a) Respondents did not always provide answers to all questions, and/or
- b) Some questions were not relevant to all respondents.

Due to their nature, some questions do not report the number of respondents (e.g., Q1.).

	Number of Graduates Surveyed:	3621
	Number of Respondents:	1640
Q1.	What is the name of the program from which you graduated?	
		# Of Respondents to question
Q2.	What is the name of the credential that you received?	
	Applied Certificate	313
	Certificate	880
	Advanced Certificate	56
	Diploma	<u>391</u>
		1640
Q3.	At which SIAST campus or regional college did you take your program?	
	Kelsey	585
	Palliser	354
	Wascana	408
	Woodland	<u>293</u>
		1640
Q4.	Which of the following best describes your reason for completing this program? (Select only one)	
	Employment in this field interested me	961
	To upgrade or formalize training in field	156
