

# 2016-17 Graduate Follow-up Survey Results

## Institutional Research and Analysis

### Introduction

Saskatchewan Polytechnic annually surveys its graduates in certificate, diploma, and degree programs to determine their employment status six months to a year after graduation.

Graduates are asked to report on their employment status, employment in a training related occupation, location of employment, overall satisfaction with the program, as well as satisfaction with preparedness for employment in a training related field.

The survey was conducted between January and April of 2018. Of the 3,934 graduates in 2016-17, 2,588 completed the survey, resulting in a response rate of 66%.

### Data Limitation

At institution level, the results from this survey are very reliable with a margin of error of +/- 1.1% at 95% confidence level. However, results at program level may not be statistically reliable due to small sample size. Caution is needed when interpreting the results.
