

# 2018 Employer Survey Results

## Institutional Research and Analysis

### Introduction

Saskatchewan Polytechnic is committed to ensuring its graduates have the training, skills, and knowledge to meet the labour market needs of employers. The Employer Survey is conducted to measure employer satisfaction with Saskatchewan Polytechnic graduate skills and training as well as to identify areas for improvement in curricula and programs. Starting 2018, the survey occurs every two years as a follow-up to the Graduate Follow-up Survey (GFS).

The survey was conducted in May-June, 2018 by a third party market research firm, Inshgtrix, located in Saskatoon. Employers were contacted either by email or phone. Of the 1,314 employers identified, 650 responded resulting in a response rate of 49%.

### Data Limitation

At institution level, the results from this survey are very reliable with a margin of error of +/- 3% at 95% confidence level. However, results at program level may not be statistically reliable due to small sample size. Caution is needed when interpreting the results.

## Table of Contents

All Programs Summary .....	1
Aboriginal Policing Preparation .....	3
