2018-19 Graduate Follow-up Survey Results

Institutional Research and Analysis

Introduction

Saskatchewan Polytechnic ("Sask Polytech") annually surveys its graduates in certificate, diploma, and degree programs to determine their employment status six months to a year after graduation.

Graduates are asked to report on their employment status, employment in a training related occupation, location of employment, overall satisfaction with their program, as well as satisfaction with preparedness for employment in a training related field.

The survey of 2018-19 graduates was conducted between February and May of 2020. Out of a valid sample of 4,140 graduates, 2,475 completed the survey. The response rate was 60%.

Data Limitation

At institution level, the results from this survey are very reliable with a margin of error of +/- 1.2% at a 95% confidence level. Results at the program level may not be statistically reliable due to small sample sizes. Caution is needed when interpreting those results.

How to Use This Workbook

To use this workbook, select the name of the program, credential, school, administering campus and program type from the filters on the first survey summary page. Once selections have been made, browse the dashboard to view the survey results.

Graduates from programs delivered by Sask Polytech and from brokered programs were surveyed. To see the results for programs delivered by Sask Polytech only, please unchecked the "Con Ed - Brokered" option in the Base/Con Ed/Brokered filter.

Further filtering by gender, citizenship, and Indigenous status is also available.

The results from the 2016-17 and the 2017-18 Graduate Follow-up Surveys are also included in this workbook. They can be viewed by selecting specific year in the Class of Graduates filter.
