

2018 - 19 Student Engagement Survey Results

Institutional Research and Analysis

Introduction

The Institutional Research and Analysis (IR&A) unit at the Saskatchewan Polytechnic ("Sask Polytech") annually surveys its current students in certificate, diploma, and degree programs to understand their experience and levels of engagement at Sask Polytech. In particular, students are asked about their learning experience, their perceptions of admission and orientation, their satisfaction with campus facilities and the quality of interactions with other students, faculty and student services. This report presents the findings from the 2018-19 survey.

In the 2018-19 academic year, 5,660 students were invited to participate in the survey between November 2018 and April 2019, of which, 2,782 completed the questionnaire. The response rate was 49 percent (up 8 percent from the last year).

Data Limitation

At institution level, the results from this survey are very reliable with a margin of error of +/- 1.3 percent at a 95 percent confidence level. However, results at program level may not be statistically reliable due to small sample sizes. Caution is needed when interpreting those results.

How to Use This Workbook

To view the findings of the survey for a specific program, select program, school, campus and credential from the filters on the "Overall satisfaction" tab.

The 2017-18 Student Engagement Survey results are also included in this workbook. They can be viewed by selecting "2017-18" in the academic year filter.
