

2022 Employer Survey Results

Introduction

Saskatchewan Polytechnic is committed to ensuring its graduates have the training, skills and knowledge to meet the labour market needs of employers. The Employer Survey is conducted to measure employer satisfaction with Saskatchewan Polytechnic graduate skills and training as well as to identify areas for improvement in curricula and programs. Starting 2018, the survey occurs every two years as a follow-up to the Graduate Follow-up Survey (GFS).

The survey was conducted in July 2022 by a third party market research firm located in Saskatoon, Saskatchewan. Employers were contacted either by email or phone. Of the 1,808 employers identified, 527 responded resulting in a response rate of 29%.

Data Limitation

At the institution level, the results from this survey are very reliable with a margin of error of +/- 3% at a 95% confidence level. However, results at the program level may not be statistically reliable due to small sample size. Therefore, caution is needed when interpreting the results.

To use this workbook, first select a school and then a program from the filters below. Once a school and program are selected, browse the dashboards to view the survey results.
