## Expansion of Health Centre meets needs of staff and students

The SIAST Wascana Campus Health Centre has added a nurse practitioner to its staff who will be able to provide SIAST employees and students with diagnosis and treatment of common conditions and minor illnesses, prescriptions and prescription renewal, specialist referrals and complete Workman's Compensation Board medical forms.

Wascana also has two health nurses who can provide health information and education, immunizations, minor first aid, referrals to health professionals and accident follow-up.

To celebrate the expansion of health services offered at Wascana's Health Centre, a special ribbon cutting ceremony was held in October.

All Health Centre services are confidential.
